

RITCHIE MINISTRY RESIGNS

RANCHERS ARE FLEEING FROM PATH OF FIRE

Three More Settlements in Boise Basin Evacuated as Timber Blazes

SMOKE IS BELCHING FROM EVERY CANYON

BOISE, Idaho, Aug. 22 (AP).—Three more settlements, Pioneer, the Golden Age Mine and Grimes Pass, were vacated tonight in the path of the fire thundering in the timber of Boise Basin.

The attack of the blazing demon on this new front forced dozens more families out of their homes and into the second refugee camp in the basin.

RELIEF MEASURES
The Red Cross and the Salvation Army were distributing food to the residents driven from their homes and National Guard tents were going up to shelter them from the cold, which has already begun to menace the 200 or 300 refugees from the burned towns of Quartzburg and Granite Creek and from other danger points. Much food has been supplied by Boise Valley towns and cities.

Several ranches on the south fork of the Payette River in the vicinity of Garden Valley were evacuated today, while families in other, packed their belongings in trucks ready to move out if the fire should come upon them.

RIVER NO GUARD
The cluster of stores and dwellings at the town of Garden Valley was separated from the fire by the south fork of Payette River, but an attendant at the forest office in Garden Valley said flames could leap the river without any hindrance.

The fire ran wild near Pioneer, Grimes Pass and was out of control near the head of Alder Creek on the Garden Valley side of the ridge which separates Boise River drainage from the Payette River drainage.

An observer who mounted the ridge between the two watersheds said fires were burning in every direction as far as he could see. Huge columns of smoke belched from almost every point.

RAGING UNCONTROLLED
Meanwhile a dozen fires raged uncontrolled in the heavy timber of Chamberlain Basin in the Idaho National Forest. Forest Ranger word 4,000 acres had burned in new fires, in addition to 40,000 destroyed in the last three weeks. Aerial planes, trucks and pack horses rushed firefighters into the area.

AGREEMENT IS BELIEVED NEAR

Negotiations for Unemployment Relief Pact Continue—Engineers Leave

While Hon. R. W. Bruhn, Minister of Public Works, with a corps of engineers, proceeded to the Interior to prepare for the commencement of highway construction work to relieve the unemployment situation in the province, Premier S. F. Tolmie and Hon. H. H. Stevens, Minister of Trade and Commerce, continued their discussions looking to a complete understanding of the Provincial-Dominion Government agreement, ratification of which is being awaited at the capital.

Yesterday morning Premier Tolmie and Mr. Stevens were in conference at Vancouver and a series of telegrams were exchanged between the negotiators and Dominion Government officials at Ottawa. Late yesterday afternoon Premier Tolmie intimated that progress had been made, but there were still a number of details to be worked out. These, it is understood, are associated with certain portions of the Transcanada Highway on the Mainland and the Dominion Government's portion of payment to the entire project.

Negotiations are to be continued over the week-end with prospects of complete agreement on all points early in the week. In the meantime active construction work on camps and preliminaries for the enlistment of men are being undertaken.

LINDBERGH AT NEMURO

NEMURO, Japan, Aug. 22 (AP).—Colonel and Mrs. Charles Lindbergh arrived over the harbor here at 4:44 p.m. today (2:44 a.m. E.S.T.). Late yesterday afternoon they landed at a safe landing place.

It first appeared they had descended to the water, but the plane arose again, seeming up and roaring around the harbor.

Rich Gold Finds On Placer Claims In Atlin Country

SPECTACULAR returns from placer gold mining in Northern British Columbia have been reported to the mines department of the Provincial Government. On Ruby Creek, in the Atlin mining district, the Lake Superior Mining Company is reported to have recovered a nugget weighing forty-seven ounces. This company has been operating with five men since the beginning of the year and intends to continue underground work this winter. It is further reported that E. T. Turnquist, of Atlin, discovered a nugget of fifteen ounces on his placer claim. He also made a clean-up, with a partner, of sixty-seven ounces of gold in two weeks.

NEW RATES ANNOUNCED

B.C. Electric Makes Tariff Cut to Save \$50,000 Annually to Patrons

After careful consideration, and a general survey, the B.C. Electric Railway Company is putting into effect a new schedule of rates for consumers of electricity, to be based on floor area and current used. It is estimated the new system will represent a saving of about \$50,000 a year to the household consumers in the city, and will simplify electrical wiring of houses in the future. The new system comes into effect on October 1.

A. T. Goward, vice-president of the company, in making the announcement yesterday stated that this new domestic rate would apply to electric service in residences for all purposes, including lighting, cooking and the operation of all household appliances. Electric water heaters, used in conjunction with an electric range, may, however, still be on the old system. The rate monthly basis, provided the installation meets with the company's requirements.

SIMPLIFIED SYSTEM
The type of rate to be adopted is what is known as the floor area rate, whereby consumers, after using a certain amount of current per month at the primary rate—such amount being based on the size of the consumer's premises—consumers will then enjoy a second rate in the schedule which will entitle them to use all additional current at a low rate.

Another advantage, under the new rate, will be that electric wiring for homes using an electric range will be simplified because only one meter will be required. At present, if a house is wired for an electric range, a separate circuit and meter is required, and in order to obtain electricity at the cooking rate for other appliances, the range circuit has to be extended. No lighting is permitted to be on the same circuit, but under the new arrangement one meter only will be necessary to register lighting and cooking consumption. Consumers will thus have the convenience of being able to make use of floor lamps, etc., on all circuits.

The rate for Victoria and within the three-mile circle on a monthly consumption will be: Six cents per kilowatt hour for the first three kilowatt hours per 100 square feet of floor area and three cents per kilowatt hour for all current used in addition. The monthly minimum charge for lighting will remain as at present, namely seventy-five cents, or with an electric range, \$2.25. The minimum floor area is 1,000 square feet and the maximum floor area 3,000 square feet.

For the areas outside the three-mile circle the rate will be: Eight

British Leaders Face Crisis

The above picture was taken recently when all factions in the political life of Great Britain united to urge disarmament. Today they are conferring on the financial problems confronting the United Kingdom. From left to right they are shown above: Lord Robert Cecil, Rt. Hon. David Lloyd George, Sir W. Robertson, Rt. Hon. Stanley Baldwin and Prime Minister Ramsay MacDonald.

Await Action on Commons Report On Beauharnois

Publication of Committee's Findings and Comment Causes Sensation in East-Fair Name of Canada Besmirched by Liberal Spoilers—Will Former Premier Purge Party?

(Special to The Colonist)

OTTAWA, Aug. 22.—Action by Parliament and the Government of the day may be able to afford protection to the public in the Beauharnois Power Corporation, Ltd., but nothing can remove the stain that the political brigands of the Liberal Party placed upon the fair name of Canada in their dealings with that concern and the administration of Rt. Hon. W. L. Mackenzie King. Just what the next move will be in the endeavor of the present Government of Rt. Hon. R. B. Bennett to clean up the mess that was revealed by the recent investigations conducted by a special parliamentary committee is a matter of much speculation not only here but throughout the East where people are more intimately acquainted with Beauharnois.

That Premier Bennett and his Government will do all that is humanly possible to protect the public in the matter, and rehabilitate the financial and industrial status of Canada with investors, both domestic and foreign, is accepted as certain, but just how they will manage to accomplish these ends is causing considerable discussion.

QUEBEC DOMINATES
Quebec is the dominating factor in the situation to a large extent. The whole project is within the confines of that province, and the ease with which Ottawa may effect its remedial measures depends to a great extent upon the co-operation that is proffered by the Provincial Administration. In this much depends on the actions of the Quebec elections where Premier Taschereau is battling desperately against the Conservative forces led by Camille Houde. Premier Taschereau, political ally of Mr. King and his Liberal associates, Senators Andrew Haydon and Wilfrid Laurier McDougall, and himself indebted to McDougall and R. O. Sweeney of Beauharnois for enormous campaign fund contributions, if returned to power—may have it in his power to make the

OWE GRATITUDE TO MR. BENNETT

Minister Pays Tribute to Premier for Ability in Leadership

VANCOUVER, Aug. 22 (CP).—Hon. H. H. Stevens, Federal Minister of Trade and Commerce, was guest of honor today at a luncheon attended by president and secretaries of Greater Vancouver Conservative organizations.

The recent session of Parliament, Mr. Stevens declared, was particularly trying, and not in twenty years had members had a more strenuous time of dealing with national problems of a more perplexing nature.

The minister paid tribute to Prime Minister R. B. Bennett for his capacity and ability in carrying the load of leadership at such a time. "The people of Canada," he said, "owe their gratitude to Hon. Mr. Bennett for the manner in which he has handled the problems of the day."

Mr. Stevens explained to his audience that the Government, not knowing the complete extent of the unemployment situation in the Dominion, had asked and obtained general authority to meet the problem. This course, he said, was entirely constitutional and in keeping with methods of dealing with other problems in a severe national situation.

CONDITIONS MORE HOPEFUL
The minister expressed his belief that conditions are more hopeful and show indications of improvement. Criticism was expressed by the speaker of the attitude of Angus MacInnis, Labor member for Vancouver South, on the unemployment problem.

NATIONAL GOVERNMENT OF ALL PARTIES WILL ASSUME CHARGE OF ADMINISTRATION

SEES HOUE AS WINNER IN QUEBEC

Despite Liberal Strength Predictions Favor Conservatives in Election

OPPOSITION MUST WIN FORTY SEATS

By CHARLES LYNCH (Copyright, 1931, by The Chicago Daily News Foreign Service)

OTTAWA, Aug. 22.—Camille Houde, Mayor of Montreal and Conservative leader in the Province of Quebec, looks as a strong threat for the Premiership of Quebec. Notwithstanding he must win forty seats to gain power in Quebec, he has thrown amazing vigor and energy into the campaign, which will stimulate keen interest in the election on Monday, August 24. Although the Conservative party has not held office in Quebec for thirty-five years, this has not daunted Mayor Houde. A vigorous and dynamic character, he has made a decided impression upon the electors and has caused much uneasiness in Liberal ranks despite their present strength.

BUTTER BONUS
The "habitant," or humble Quebec farmer, will decide whether P. Louis Alexandre Taschereau, politician (and incumbent), or Camille Houde, man of the people, is to be Premier. Both Conservatives and Liberals profess strength in the rural sections, and depression among the farmers is a strong talking point.

Credit for the idea of a three-cent butter bonus promised by the Taschereau Government is claimed by the Conservatives. Exclusion of cream from the American market has dropped the price of butter in Quebec below the price of production, and the dairy farmers are very restless.

Another point which Camille Houde has been stressing is that the Taschereau Government has refused old age pensions. He has assailed the Liberal Cabinet on many other points.

Mayor Houde has emphasized to the Quebec "habitant" that he is not enjoying the same luxuries as the English-speaking farmers of Ontario. Cheaper hydroelectric power under public ownership is credited with making farming less of a hardship to the Ontario farmers.

ARE OPPOSITES
Camille Houde and Premier Taschereau are decided opposites. Houde lives in a flat over a Montreal grocery store which costs him \$40 a month. Before his election Mayor Houde was a humble insurance agent. Mr. Taschereau, a member of one of the oldest French Canadian families of Canada, is a nephew of Cardinal Taschereau, a nephew of the late Sir Elzear Taschereau, a former Chief Justice of the Supreme Court of Canada, and a patrician in every respect.

The Conservatives numbered twelve members in the last Quebec Legislature. On Monday nine seats will be filled. Mr. Houde must gain forty to emerge victorious and, with the depression to help him, his chances are good.

After Week-End of Continual Conferences, Premier Ramsay MacDonald Unable to Consolidate Labor Support—Calls on Other Parties to Aid in Worst Crisis Since War

Coalition Only Temporary; Election in Few Months

LONDON, Aug. 24.—Unable to gain support within the ranks of his own party and the independent supporters who have held him in power, Rt. Hon. Ramsay MacDonald has resigned. His Majesty the King has asked him to form a National Government, containing members of Conservative and Liberal parties to carry on the affairs of the country temporarily and attempt to balance the budget. He will do so.

Rt. Hon. Stanley Baldwin has agreed to serve in a Cabinet under Mr. MacDonald. Liberal leaders, in the absence of Mr. Hon. David Lloyd George, have also agreed to the temporary Government.

GRAVE CRISIS
This new Government is set up in the face of a great national crisis, the worst since the Great War.

With the prospect of failure to consolidate the forces against him, following days of conferences, it became evident that only extreme measures would save the Labor Government.

His Majesty King George, owing to the gravity of the situation, cut short his holiday and returned post haste from Scotland on Saturday.

KING TAKES ACTION
The King conferred with party heads, and decided to call upon the three major parties to form a non-party Government to deal with the emergency created by the budget deficit.

Three weeks ago the official standpoint of the Labor Party was that the May committee's economy report estimating next year's deficit at £120,000,000 (\$383,300,000) and asking for economies amounting to £96,000,000 (\$466,560,000) of which £66,000,000 (\$320,760,000) should be saved from the unemployment insurance fund—was exaggerated. Meanwhile Prime Minister Ramsay MacDonald and Chancellor of the Exchequer, Snowden have come to understand through the pressure of big banks and Treasury experts' evidence that the economy committee did not exaggerate, but even underestimated the seriousness of the situation.

CUT IN DOLE
They now agree that unemployment expenditure is the keystone of the British financial difficulties and are willing to accept most of the economy committee's recommendations, even including a two-shilling (40 cents) cut in the "dole."

Mr. MacDonald hoped to carry through this programme with the support of the two opposition parties against the opposition from his own camp.

GRAHAM OPPOSES
The resignation of some of his Ministers, namely, Arthur Greenwood, Minister of Health, and Margaret G. Bonfield, Minister of Labor, was foreseen, but the surprising turn of Foreign Minister Arthur Henderson and William Graham, President of the Board of Trade, in joining the opposing side, broke the Premier's backbone. Mr. Graham until recently was regarded as Mr. Snowden's most faithful henchman. Only recently he stated in the House of Commons that he always agreed with the Chancellor.

Mr. Henderson is the most influential member of the Labor party executive. Observers close to the Labor party believe it possible that Mr. Henderson's attitude is another step in the estrangement between himself and Mr. MacDonald which was first visible during the Paris and London Conferences in July. It is no secret that Mr. Henderson is the most serious candidate for Labor party leadership. Mr. MacDonald's position has been badly shaken by recent events.

FIRE MENACES SEVERAL TOWNS

Waldo Reported in Danger—Ferne Section Well Under Control

FERNIE, Aug. 22 (CP).—Further deep concern is felt, due to reports received today from the extreme southwest section of this fire district. Around the town of Waldo a very bad fire is now raging, and calls for more men have been made. The Great Northern Railway ordered out a train and fire-fighting crew to proceed to that section. They already have one train and crew at work there with pumps and emergency hose.

The small towns of Dorr and Flagstone, between Waldo and Newgate, it is reported, now appear to be endangered.

The fire near Elko is reported to be quiet, and the Fernie section continues well under control. At Corbin the proximity of the fire to that settlement makes it a menace, but, as it has not made any marked advance or showed signs of renewed vigor for some days, it is believed the work of the fire crews will shortly make it harmless.

King of Siam To Cruise Off Island Coast

VANCOUVER, Aug. 22.—The King and Queen of Siam and members of their party, it is understood here, will make a cruise of Vancouver Island waters starting about September 2, following their arrival on the Coast, and lasting until September 12, when they will leave Victoria on their return to their kingdom.

The cruise will be made on the yacht Tacome, owned by W. E. Boeing, of Seattle, as guests of Mr. and Mrs. Boeing, it is stated.

Papers in Spain Are Suspended

By RALPH E. FORTE (Copyright, 1931, by The Chicago Daily News Foreign Service)

MADRID, Aug. 22.—Seven Catholic newspapers of the Basque and Navarre Provinces, charged by the Central Government with having intermittently spread noxious propaganda and with inciting public sentiment against the republic, began a period of suspension today, following the closing of their plants by police last night.

Four of the newspapers, suppressed for an indefinite period, are powerful tools of the Catholic elements of Bilbao. The other three, published at San Sebastian, are also constantly backed up by an army of Catholic readers.

Two Found Dead in Burning Home With Foul Play Evident

Port Alberni Firemen Discover Bodies of Man and Woman With Throats Cut—Smart Work Prevents Spread of Fire

PORT ALBERNI, Aug. 22.—Alarm of fire, to which the local department responded at 4:30 this morning, led to discovery of a gruesome tragedy in which two are dead, victims of possible murder or suicide.

The dead are P. O'Toole, owner of the house on Eighth Avenue, where the outbreak of fire was discovered, and Mrs. Grace Tunin, whose body was found on the bed of the room which alone was damaged before the fire was extinguished.

The firemen approached the building they stumbled over the body of O'Toole, dressed in underclothes only and with a razor case in his hand and the throat cut. Entering, they found Mrs. Tunin's body in the blazing bedroom with the bedclothes hooded. An

MUST IMPROVE BEEF CATTLE

Premier Tolmie Says Local Livestock Inferior to Argentine Stock

VANCOUVER, Aug. 22 (CP).—With perfect weather prevailing, and before an audience that filled the spacious new grandstand, the twenty-second annual fair of Vancouver Exhibition Association was opened at 2 p.m. by Premier S. F. Tolmie.

"The greatest exhibition west of the Great Lakes," declared Premier Tolmie, in epitomizing attractions and advantages of the exhibition.

Indicating the fine new buildings, the Premier swept the magnificent panorama of mountain and sea with a gesture and predicted that an exhibition with such a setting, backed by the varied resources of British Columbia and with a city of the magnitude of Vancouver for its immediate locale, cannot but continue to prosper.

FINE EXHIBITION
"British Columbia's resources serve to give this show varied attractions that will draw more people. Development of this exhibition is a striking tribute to the men who have managed its affairs."

"Competition created by these fairs," continued the Premier, "goes a long way toward improving the product of factory and farm. The farmer comes here to learn what constitutes a good animal. He is able to discriminate in increasing his herd. Many a man thinks he has a fine herd until he sees his animals in the ring here in competition with others."

As an advertising feature the fair has great value, the Premier said. "That the Provincial Government recognizes this value is demonstrated by the fact that it has contributed \$176,000 to the exhibition during the past twenty-one years."

URGENT IMPROVEMENT
Reverting to the desired improvement in livestock, the Premier reminded his hearers that only a small percentage of the livestock which goes through British Columbia is fit to export to the United States. He said it is worthy to compete with beef from the Argentine, which this province must meet in foreign markets.

Five shipments of approved purebred livestock have come to British Columbia under the arrangement made with the Empire Marketing Board for the absorption of freight on such consignments. Such aid, said the Premier, affords shippers a chance to improve their herds at a reasonable cost.

LADDER TRUCKS THRILL CROWD

Crew of Yates Street Fire Truck Has Narrow Escape—Automobile Damaged

The after-theatre crowd was given a thrilling sight at the corner of Broad and Yates Streets shortly after midnight when two fire trucks nearly collided and a parked car was damaged in the attempt to avoid disaster.

A crew of five men probably owe their lives to the quick action of Driver William Henley, of the Yates Street ladder truck.

The machine was responding to an alarm at the corner of Yates and Wharf Streets when the accident occurred. Another ladder truck from the city fire hall was proceeding along Broad to make the turn down Yates Street.

Both trucks arrived at the intersection at the same time. Realizing the central station truck would make the right-hand turn, Driver Henley swung his wheel over to the left and missed the heavy truck by inches. In doing so, however, his own machine struck the front of an automobile, owned by Henry King, customs broker, and did considerable damage.

The alarm to which the fire trucks were responding was a false one, and is believed to have been turned in by the same person who has been pulling the alarm keys at various points along Wharf Street during the course of the last few weeks.

Government, in which case the new Government would go before Parliament for a vote of confidence. Or Prime Minister MacDonald might ask for a dissolution of Parliament and then the issues would be carried to the country in general election. "The present possibility has been prominent in all discussion of the crisis—he might recommend formation of a National Government, which would make all parties equally responsible for the solution. Who would head such a Government, if it should be decided upon, was problematical."

BALDWIN CHERISHED
When Stanley Baldwin arrived from France tonight he was cheered by crowds who shouted "He is the man to save the country!" The crowd closed in about him as if he were a conquering hero returning, and a police formation was necessary to clear his way.

At 10 Downing Street reports that the Prime Minister was leaving London tonight to meet the King en route and inform him of the situation which was denied. The Sunday Times claimed to have learned that a train was waiting for him at Euston Station until a late hour.

Throughout the two weeks of negotiations a general election has been considered the last resort in the way of settlement. Yet the possibility of an election seemed strengthened tonight as observers surveyed the strength of the House of Commons.

The Labor Party holds 281 seats, the Conservatives 263, the Liberals fifty-eight, Independents eleven, and Irish Nationalists two. In such a line-up Stanley Baldwin would require at least 296 to 300 votes to have a working majority.

Continued from Page 1

leaped a ditch, turned two somersaults and crashed into a telephone pole, landing right side up. The car was completely demolished.

BICYCLIST HURT
The other accident occurred at the intersection of Gorge Road and Carroll Street. John S. McKillop, of Saanich, was driving west on Gorge Road, when he collided with a bicyclist, James Smith, who was riding south on Carroll Street and entering the main thoroughfare.

Mr. McKillop swung to the left to try to avoid the collision, but caught the bicyclist with his right front end. Going another machine approaching eastbound, Mr. McKillop swung his car to the right again and brought it to a stop at the curb.

The boy and his bicycle were dragged 100 feet by the car. His left side was badly cut and bruised, and his arm badly injured. He was taken in his ambulance to the Jubilee Hospital, where Dr. Hermann Robertson gave treatment.

DO-X ENDS VOYAGE

MIAMI, Fla., Aug. 22 (AP).—The German flying boat DO-X, largest aeroplane in the world, landed on today to complete its leisurely voyage from Germany to the United States, begun November 5. The big ship took off from Antilla, Cuba, early this morning and was first sighted over Miami at 10:25 a.m. E.S.T. It landed after circling the city several times.

BRINGS NEWS OF FASHIONS

Mrs. Angus Campbell, Back From European Trip, Reports Latest Tendencies

Silhouette form-fitting lines, cut very low in the back and close fitting as to bodice and hip, but flaring from the knees downward; a predilection for eggshell and oyster-white satin; various forms of the short coat-wrap made of velvet, sequined brocade or other fancy material as an accompanying part of the ensemble; and a still upward moving waistline are some of the details of evening dress for the coming season which Fashion has already decided, according to Mrs. Angus Campbell, the well-known firm of ladies' outfitters, Government Street, who returned to the city yesterday after a two and a half months' buying trip in Europe.

Unlike some commentators just returned from the Old Land, Mrs. Campbell was not conscious of any special note of depression in either England or Scotland. Although it rained almost incessantly while she was there, one did not find it either uncomfortable or particularly inconvenient, accepting it like the Britishers themselves, in a matter-of-course spirit. She was more conscious of the so-called world depression by the absence of American tourists, both in Britain and France, than in the actual local conditions in either country.

It seemed to her a highly favorable comment on the relative well-being of Britain that more English and Scottish people than usual were to be seen traveling both in Europe and Canada, while there was a notable absence of American tourists everywhere, particularly in France. Paris was seriously alarmed by their absence this year, and business houses, restaurants and other places of entertainment had through the failure of the usual flood of visitors from this side.

"HAPPY AND PROSPEROUS"
"Merchants are complaining, but they are not making the big reductions which are being made over here. Things looked very happy and prosperous to me," Mrs. Campbell said.

London, which was her headquarters and starting point for trips to Leeds and Leicester, Paris and Brussels, and Edinburgh and other Scottish cities, seemed to her to have changed enormously since her last visit. The London County Council housing plan had developed whole areas of neat and pretty suburban villages, never like London so well or thought it more attractive, the wet summer having made the parks beautifully green and fresh.

The shops were interesting. Some were responding to popular demand by offering cheaper commodities. But this had its disadvantages. The public might demand cheaper things, but even in England they could only get what they paid for, so that there were really not many extraordinary bargains.

THE STYLES
Mrs. Campbell reviewed the fashion forecast from the London, Paris, Brussels and New York point of view, and while there is some divergence of opinion in detail, all are fairly well agreed in essentials as outlined above. The tailored style is also almost generally regarded to move in detail, the skirt length for such occasions being fifteen inches from the ground. For sports use the two-piece cardigan of Scotch tweed or the new three-piece knitted outfit, some Paris samples of which she has brought back with her, are popular.

Every other occasion calls for something of fustian character. Afternoon and formal afternoon frocks are two distinct styles, the latter closely resembling the evening gown, but with a shorter coat of lace or georgette.

In Paris every evening dress had its little coat. The blue-cutting of the former alms at moulded lines, and the evening gowns are worn very long.

AIM AT VARIETY
"Aim at variety; we were told that we must not send our clients out dressed all in the color. Things may harmonize, but must not strike a dead uniform note. Accessories, shoes, hat, gloves and bag can be studied to get the touch of color," Mrs. Campbell suggested.

Brown is the season's most popular color, closely run by black mixtures of red, sprinklings of green. But the favorite old standby, blue, is at the bottom of the scale this season.

Hats offer a tempting variety of styles—something for every type of woman. The bowler, which has been evolved for the motorist, Paris was a fascinating place to study these styles, Frenchwomen seeming to have a remarkable genius for wearing their hats with chic. In fact, the French candidly admit they charge for style and design rather than for materials.

Apart from Victoria, Mrs. Campbell says that she would find it difficult to decide whether to live in Canada or Great Britain. But Victoria still has the premier place in her affections. She was greatly struck by the happy way in which the British are carrying their burden at the present time, with greater reason to look worried, they actually seemed less anxious than many of the people on this side who had been dabbling in stocks.

Sir Newton Moore To Visit Canada

LONDON, Aug. 22 (CP).—Major-General Sir Newton Moore is leaving on a visit to Canada, New Zealand and Australia. Sir Newton, who established a prominent military and political career in the Antipodes, did not divulge the date of his departure nor the purpose of his trip.

Twice Premier and occupant of many offices, Sir Newton served for many years in the Government of Western Australia. He was general officer commanding the Australian Imperial Force from 1915 to 1917.

Saanich Relief Fund Receives Generous Cheque

ALTHOUGH formation of an organization in Saanich similar to the Friendly Help Association has not yet been completed, the preliminary work has already done much to increase contributions to the relief fund, Reeve William Crouch announced yesterday.

Residents of Cadboro Bay informed the reeve yesterday that they were much in favor of the organization. Quite a number of donations were made to the relief fund, one resident alone giving the reeve a \$500 cheque.

The committee appointed to organize the Saanich charitable organization will meet in the Lake Hill Community Hall at 3 o'clock Monday to draw up a constitution and nominate officers.

EARL JELlicoe GIVEN WELCOME

Distinguished Gathering Greets Famous Admiral on Landing at Quebec

QUEBEC, Aug. 22 (CP).—A nineteen-gun salute was fired from the Citadel this morning as the Canadian Pacific liner Duchess of York swung into her dock to land Admiral of the Fleet Earl Jellicoe of Scapa. A distinguished gathering of Canadian military and veteran officials prepared to welcome the hero of Jutland.

The dock was ablaze with decorations and dress uniforms of officers and soldiers as Quebec prepared to hold a brief reception for the distinguished British sailor before he rejoined the liner to continue his voyage to Montreal.

Earl Jellicoe came to Canada to officially open the Canadian National Exhibition at Toronto, August 28, and to preside over the fifth biennial convention of the British Empire Service League, opening in Toronto. In addition, he will visit Ottawa and make many appearances at public functions during his stay.

The Admiral of the Fleet was accompanied by Countess Jellicoe and their two children.

NEW RATES ANNOUNCED

Continued from Page 1

cents per kilowatt hour for the first three kilowatt hours per 100 square feet of floor area and three cents per kilowatt hour for all current use in addition. The monthly minimum charge for lighting will remain as at present, namely \$1, or with an electric range \$2.50. The minimum and maximum floor area will be the same as that in the previous instance.

In the case of existing electric ranges users, it was pointed out by Mr. Goward it is the intention of the company gradually to make the wiring changes to provide for one meter. This work will be carried out at the convenience of the consumer and at the expense of the company. In the meantime, however, such consumers may retain the present arrangement of two separate meters at the existing separate range, and lighting rates and conditions, but all new business, on and after October 1, will come under the new conditions.

Company officials estimate that the adoption of these rates will benefit some 18,000 domestic consumers, in the aggregate, to the extent of approximately \$50,000 a year. This estimate is based on the domestic consumption for the past twelve months.

WILL TRADE WITH SOVIET

North Pacific Lines Resuming Shipping Relations With Siberian Ports

SEATTLE, Aug. 22 (AP).—The Times said today that the fleet of the Tacoma Oriental Steamship Company, the Oceanic and Oriental Navigation Company and the States Steamship Company of Portland will soon be used in a reopening of trade between North Pacific ports and Vladivostok, Siberia. It will be the first regular service between here and Siberia since the Great War.

The State Steamship Company is agent for the first two firms mentioned. The newspaper said the steamship Everett, of the Tacoma Oriental, which sailed from here on July 26 for the Orient, will be the first ship in the new service, and is expected to land in Vladivostok in mid-September for this coast.

Resumption of shipping relations followed arrangements with the Soviet Government. No mention of the nature of the cargo to be loaded in Siberia for the United States was made, but it was definitely said no Soviet lumber would be shipped to this coast. The Times said it was probable salmon from the Kamchatka Peninsula fisheries would form part of the cargoes in the new service. No westbound cargo will be carried. The shipments from Russia will be handled by the Amtorg Corporation, the Soviet Government's trading organization. The American shippers involved operate vessels from coast ports to the Orient.

"I'm down and out, and that's the plain truth, your worship," said the prisoner.

"Not exactly," returned the judge. "You're down, but you're not out—six months."

THE ROAD BACK TO HEALTH

—An Epoch-Making Discovery

LIFE Can Continue Indefinitely So Long as Certain Simple Conditions Are Fulfilled.

THIS fact has been proved by Dr. Carrol, of the Rockefeller Institute. Scientific proof exists that the process of decay which we call old age has nothing to do with years.

A GERMAN scientist of repute has recently said: "Before the end of this century, science will have found methods by which a man may live upon this earth for a thousand years if he chooses." The professor of physical chemistry in the University of Toronto has lately reasserted his belief in man's "ability to perpetually rejuvenate the body and to arrest decay." These statements show the trend of scientific thought towards longevity.

WHILE we do not indulge in dreams of living a thousand years, we have come to recognize the feasibility of extending the allotted span by thirty to fifty years.

A Revolutionary Method
The achievement of longevity, together with the full enjoyment of mental and physical activity, is only one of the objectives of the Archeus System, the most far-reaching Method of Physical Regeneration and Rejuvenation and Mental Revitalization which has ever been evolved. It is radically different from anything previously attempted in its approach to the problem of (1) increasing the length of life; (2) increasing the fullness of life.

A Message of Rejuvenation for All
A THERAPEUTICAL treatment has been discovered which, without recourse to surgery or drugs, produces definite results in restoring ailing men and women, and those past their prime, to the full vigor and appearance of youth. This is the Archeus System of Rejuvenation.

Disease Is Ignorance
SIR Bruce Bruce-Porter says in his National Health Week article in The Daily Express: "Disease is the result of ignorance." The Archeus System supplies you with perfect knowledge of yourself, your glands, as well as of the other departments of your co-operative commonwealth—your body. This is the best health insurance offered the modern world. With this knowledge you very quickly banish disease.

The Archeus System a Proven Success
THE Archeus System is not mere theory. It has been put to the acid test for the past seven years in numerous and varied cases and has proved consistently successful.

Easy to Understand and Apply
IT is easy to apply and its use in no way upsets your daily life. But what a different creature you will both feel and look after the application of its principles! All the many illnesses to which we, most of us, are all too prone, will be things of the past. THE Archeus System can and will give you back your health, create beauty and personality, and greatly increase the length of your life.

BUT above all things, it will give you such a joy in living as you have never known before. The coupon brings you the Archeus System book free. Mail it today.

To the NEW HEALTH CLINIC, 218-219-220 Central Building, Victoria, B.C.

Please send me your book, "THE GREAT DISCOVERY."

Salmon Catch for 1930 Made Record For B.C. Industry

Last Year's Pack Reached Total of 2,221,819 Cases—Greater Than Banner Year of 1926—Provincial Fisheries Dep't Issues Annual Report Covering All Products

HON. S. L. Howe, commissioner of fisheries, has just issued the report of the Provincial Fisheries Department for the year 1930. The report, and its appendix, maintains the high standard of the publications of that department. It deals at length with the commercial fisheries of the province, contains a valuable contribution to the life-history of the sockeye salmon, and bulletins on the "Pacific Salmon" and "Edible Fish Meal" and reports on the salmon spawning areas of the principal rivers.

The value of the fishery products of the province for 1930, the last date available at the time the report was issued, totaled \$33,518,521, of which British Columbia produced \$23,900,692 or 46 per cent. In that year, British Columbia again led the provinces in the Dominion in the value of her fishery products. Her output exceeded in value that of available at the time the report was issued, totaled \$33,518,521, of which British Columbia produced \$23,900,692 or 46 per cent. In that year, British Columbia again led the provinces in the Dominion in the value of her fishery products.

Issues Report of 1930 Fisheries

HON. S. L. HOWE
Provincial Secretary and Commissioner of Fisheries, whose annual statement of industry, issued yesterday, shows a record greater than the peak year of 1926. The report is an interesting review of the conditions prevailing in provincial fisheries during last year.

was \$36,256,087 or 57.5 per cent of the total employed in Canada, of which \$13,794,507 was employed in catching and handling the catches, and \$22,461,580 invested in canneries, fish packing establishments and fish reduction plants.

The number of persons employed in the fisheries of British Columbia in 1930 was 20,435 or 25 per cent of Canada's total of 80,450. Of the 20,435, 12,675 were employed in catching and handling the catches, and 7,760 in packing, curing and fish reduction. The number engaged in 1929 was 2,441 greater than in the preceding year.

SALMON PACK IN 1930

The catches of salmon in the province in 1930 produced a pack of 2,221,819 cases. It was the largest ever made in the province. It surpassed the former high record of 1926 by 156,629 cases. There was an increase in both the pack of sockeye and pink. The pink pack constituted 50 per cent of the total. In reviewing the catches of salmon in the Fraser River in 1930, the report states that the catches of sockeye in provincial waters of the Fraser River system produced a pack of 1,03,692 cases—the largest made there since 1917. It was 21 per cent greater than that made in the fourth preceding year, 1926, the brood year of the 1930 run.

The catches of sockeye in the State of Washington waters of the Fraser River system in 1930 produced a combined pack of 455,886 cases, of which 77 per cent was made from catches in the State of Washington waters and 23 per cent in provincial waters. The combined pack was the largest made in that system since 1917. It was also the largest sockeye pack made in the system in that year's cycle since 1914. It exceeded the pack made in 1926, the brood year of the 1930 run, by 325,524 cases or nearly 250 per cent.

For an understanding of the full significance of such an unusual occurrence on the present depleted condition of the sockeye runs to the Fraser River system, the report states, it is necessary to review conditions on both the fishing and spawning grounds of the Fraser River system in 1926, and the cycle of that year's run, because the runs in 1926 were the product of the fish that spawned in the Fraser basin in 1926. Conditions on both the fishing and the spawning grounds of the Fraser River system in 1926 were exceptional—unparalleled in the records. The records of 1926 show that the combined catches of sockeye made that year produced a pack of 130,362 cases, of which 65.75 per cent was packed from catches made in provincial waters and 34.25 per cent in Washington waters. It was the only time in over twenty years in which the provincial pack exceeded the state pack, with the exception of 1922, when the provincial pack exceeded the state pack by 3,266 cases.

UNUSUAL CATCHES

In 1926 the catches made in July and August produced a total pack of 75,000 cases, of which 45,000 cases were packed in the State of Washington, and 30,000 cases in British Columbia. The balance of the catches made that year were made in British Columbia waters in September and October, and produced a pack of 55,000 cases or 40 per cent of the total made in the system that year. The catches made in Washington waters in those months did not add materially to its pack. This unprecedented occurrence was due to the fact that in September and October, 1926, a very considerable number of sockeye entered the Gulf of Georgia in British Columbia waters without having been intercepted or reported in other waters. The traps in Juan de Fuca Straits, the traps and purse-nets in the estuary waters of the State of Washington that lead to the Gulf of Georgia from the south, and the nets used in the waters to the north of that gulf, caught very few sockeye during September and October. It was not determined how the fish reached the gulf without being intercepted. Having reached there, the fish were drawn upon only by the less than 1,000 fish-nets of the Canadian fishermen who were engaged in the gulf and in the lower river, and whose operations were, by Dominion regulations, limited to fishing for five days each week, and they ceased fishing September 29. As a result of this limited fishing, the number caught was far less proportionately than was taken from the July and August runs, and the escapement was very much greater.

FRASER RIVER SYSTEM

The catches of sockeye in the Fraser River system in 1930 afford an impressive object lesson to all concerned in the industry and to the consuming public at large. The catches of sockeye made in that system that year demonstrate forcefully that the former great runs of sockeye to that system can be restored; that all that is required to restore the great runs of the past is to insure an adequate seeding of all the spawning beds of the Fraser basin. The runs cannot be restored in any other way.

As stated, the sockeye catches made in 1930 consisted of fish from the spawnings of 1926. The catches in 1926 produced a pack of 130,362 cases. The catches in 1930 produced a pack of 455,886 cases, an increase over 1926 of 325,524 cases, or 250 per cent greater.

The appendix of the report contains the sixteenth annual "Contribution to the Life History of the Sockeye Salmon" by Dr. W. A. and Lucy S. Clemens. In their introduction to the present report, Drs. Clemens state that the sockeye runs to the streams of the province in 1930 exhibited some very encouraging features. That to the Fraser may be said to have been almost phenomenal, as no run of like magnitude has occurred since 1917. The pack of 455,886 cases has only been exceeded in that cycle by those of the year 1902 with 633,033 and 1914 with 533,413 cases. The packs in the early years of the cycle were as follows: 1902, 633,033 cases; 1906, 303,249 cases; 1910, 398,446 cases. It will be seen that this cycle has evidently re-established itself through the spawnings of late-running fishes.

In speculating on the runs of sockeye to the rivers of the province in 1931, Drs. Clemens state that the run to the Fraser will be derived largely from the spawnings of 1927. The report on the spawnings of that year states that practically no sockeye reached the Upper Fraser tributaries except in the Shuswap area, where approximately 100,000 individuals were observed in Adams

and Little Rivers. Apparently the run to the Lower Fraser spawning areas was an average one. While it is impossible to accurately predict the return in 1931, it would seem that a pack somewhat in excess of 100,000 cases might be made.

PILCHARD AND HERRING

During the year the joint provincial and Dominion Government investigation into the life history of the pilchard and herring and the condition of their fisheries within provincial waters was continued.

Since 1925, when the use of pilchards for fish reduction was sanctioned and provided a suitable outlet for the production, this fishery, and with it the fish reduction industry, has grown to such an extent that a catch of over 172,000,000 pounds was recorded in 1929. The strain placed upon the stock of pilchards in our waters by a drain of such magnitude must be very considerable and sufficient to create some doubt as to the ability of the stock to withstand such a strain. The purpose of this joint investigation is to determine as far as possible the extent to which exploitation may be safely pursued and the wisdom of further exploitation. During 1930 technique was developed by which the pilchards' age may be determined by examination of their otoliths, or ear-bones. While this method has not been fully standardized, it indicates that the bulk of the British Columbia pilchard stock, taken at both Nootka

and Kildonan, was composed of fish which were in their fifth and sixth years.

PILCHARD AND SARDINE

Since the beginning of pilchard fisheries it has been a moot question among the fishermen whether the pilchards taken off the West Coast of British Columbia are the same individual fish as those taken off the coast of California and there called the California sardine. The question of the identity of these fish stocks is one of considerable importance from the point of view of the conservationist and is one which may be of very considerable importance should the question ever be raised of the co-operation of Canada and the United States in conserving the stock or stocks on which the British Columbia pilchards and the California sardine are dependent. Indubitably, they are of the same species and in recent years the question has been raised by the scientific investigators of California and British Columbia as to whether or not the adult California sardines make a summer migration into Canadian waters, where they are captured as pilchards. Dr. Hart and his staff are collecting and studying data dealing with this important phase of the work preliminary to publication.

It has been suggested that the effluent waters from pilchard reduction plants on the West Coast of Vancouver Island have caused the herring to abandon a considerable area of their spawning grounds. In view of the fact that waste from reduction consists of over 3 per cent oil and 5 per cent meal, the suggestion that they might exert a repelling effect on herring spawning areas does not appear unreasonable.

The conclusion of the investigation to date is that under ordinary conditions of operation plants are very unlikely to interfere in any way with the spawning of herring, or to any great extent with other forms of marine life.

The appendix of the report contains detailed reports from the spawning grounds of the Fraser, Skeena and Nass Rivers, and Rivers and Smith Inlets. In most of these areas spawning conditions were reported satisfactory. It also contains the bulletins on "The Pacific Salmon" and "Edible Fish Meal" which were issued by the department during the year.

The report also gives detailed statements showing the salmon pack of the entire province, not only for the year 1930, but for previous years.

SCOTS TO VISIT AUSTRALIA

By way of returning the visit paid to Scotland three years ago by 600 families who returned to the Old Country to rene family ties as well as link up with Scottish industries, Scots folk are going to Australia. The itinerary includes 138 days of travel and sightseeing, and the trip home will begin in March, 1932.

Your Health and Your Weight

Cases of Overweight Due to Gland Disturbance

By JAS. W. BARTON, M.D.

Although ninety-nine cases in a hundred of overweight individuals are due to these glandular disturbances, it is wise, nevertheless, to remember that there is one case in a hundred that is due to glandular disturbance.

As we think of glandular disturbance in connection with overweight, our first thought is due to the thyroid gland, and the thyroid gland has also something to do with the control of weight. In addition to the thyroid gland in the neck, there is the tiny pituitary gland on the floor of the skull, the thymus gland, below the thyroid, behind the breast bone, and the generative glands.

Dr. Leonard Williams, Great Britain, in discussing the overweight due to these glandular disturbances, tells us that the fat tissue in this type of overweight is not like that due to overeating or underexercising, but is a different kind of fat.

Sometimes the type of overweight due to one certain gland can be detected by certain physical signs in the individual. For instance, where the thyroid gland in the neck is at fault, that is not manufacturing enough thyroid juice, there is what is called the "eyebrow" sign, which consists of the absence of the outer third or outer half of the eyebrow. There is sometimes also, but not always, a harsh dry skin, especially over the back upper arms and a slight flush or redness in the cheeks. The usual place for this overweight to settle is above the waist line, particularly the upper arms and shoulders.

The overweight due to the little pituitary gland usually shows the increase at and below the waist line and a face that is so rounded that it has been called "pudgy face." The abdomen is usually barrel shaped. The absence of the half moons on the nails has been noted on the majority of cases with this type of overweight.

The type of overweight due to

CAMPAIGN FUNDS

With the exception possibly of the lavish ex-
penditures of the Canadian National Railway
in the course of their operation under public
ownership, no subject which came up for con-
sideration during the late session of Parliament
arrested attention to a greater degree than the
inquiry into the Beauharnois project.
The revelations connected with the disbursement
of political campaign funds were of a stunning
character. Because of them it was necessary for
Parliament to step in, and, hereafter, the Beau-
harnois power development scheme will be con-
ducted in a manner which will afford better safe-
guards than any of the past for moneys invested
in the project.

The principal promoter of the Beauharnois
project has been Mr. R. O. Sweeney, who is now
president of the Beauharnois Power Corporation,
Limited. His evidence before a select committee
of Parliament, particularly in relation to cam-
paign funds, disclosed a condition of affairs and
involved names of certain men connected with
the public life of the Dominion that has left
an impression of political venality that is almost
unbelievable. It was disclosed that a sum aggre-
gating \$884,000 was paid out for political pur-
poses. Of this \$300,000 was drawn from the
company's funds. The balance was raised by
Mr. Sweeney, and part came from the large profit
made on the sale of the syndicate assets to the
Beauharnois Power Corporation; in other words,
indirectly out of the moneys borrowed on the
sale of the company's bonds. This is the language
of the select committee's report.

Mr. Sweeney admitted that he contributed to
the Liberal Party "somewhere around \$600,000 to
\$700,000." He paid the moneys to Senators
Haydon and Raymond. The moneys paid to the
latter, it was admitted, were to take care of the
Liberal Party in Quebec. The amount for this
purpose, in other words to keep the Liberal Party
in Quebec friendly to the Beauharnois project,
was in the neighborhood of \$200,000. The balance
of the \$684,000 to \$700,000 paid out appears to
have gone to the Federal Liberal Party. Under
the direction of Mr. Sweeney there was also a
sum of \$120,000 paid to Mr. John Aird, J.R.
later, when asked if this money was for any
political party, he replied, "no," but that it was on
his own behalf. The committee agreed that there
was no evidence to show that this \$120,000
reached any political organization or any person
authorized to receive campaign funds.

Senator Haydon, who is mentioned as having
received moneys from Mr. Sweeney, has been a
member of the Senate since March, 1924. His
firm, Messrs. McEwen, Haydon and Ebbs, was
retained for the Beauharnois Power Syndicate
in the autumn of 1928 and was to be paid
\$50,000 conditional on the approval of an applica-
tion of that company to the Government for
the right to divert 30,000 c.f.s. As well, there was
to be retained of \$15,000 for three years. The
committee, commenting on this transaction, said
in its report, "the acceptance of the above-men-
tioned contingent retainer and of the \$50,000
involved and of the campaign funds by Senator
Haydon cannot be defended and is strongly
condemned."

Senator Raymond was made a Senator in
December, 1927. He held shares valued at
\$30,000 in the Beauharnois Syndicate which he
subscribed to in April, 1927. These shares be-
came 1,600 units in the second syndicate, and
he had the right to subscribe for a further 1,600
units, which he did. The report says that on the
whole transaction, "he realized as of the
17th December, 1929, \$529,000 profit and 14,040
shares of Class A stock of the Beauharnois Power
Corporation. As noted, Senator Raymond, as
well, received from Mr. Sweeney \$200,000 of
campaign funds for the Liberal Party. The com-
mittee's report says: "In view of Mr. Sweeney's
attitude throughout and his views as to the
necessity for political influence, it is hardly
conceivable that Mr. Sweeney would pay this large
sum of money over to Senator Raymond unless
he at least was satisfied that the Senator's in-
fluence had been or would be worth the money,
and it is remarkable that Senator Raymond did
not insist on making some explanation of his
position in this regard, in view of the evidence."

Senator W. L. McDougall was appointed to
the Senate in June, 1926. He occupied the pos-
ition of chairman of the Montreal Harbor Board.
It was in May, 1928, that Senator McDougall
took over 800 units of the first Beauharnois Syn-
dicate. These 800 units swelled to 1,600 on the
formation of the second syndicate, and, like
Senator Raymond, he exercised his right to ac-
quire a further 1,600 units. In October, 1929,
the shares acquired by Senator McDougall were
transferred to Mr. John P. Ebbs, a member of
the Haydon firm. The select committee was
unable to determine the reason for this transfer.
Senator McDougall's political activities in con-
nection with the Beauharnois Syndicate were
the subject of evidence, and it was evidenced in
connection with both Senators involved that
they bought their units in the first syndicate
for many fewer dollars per share than any other
of the members, except possibly Mr. Sweeney,
who got some of his for a consideration other
than cash. Referring specifically to Senator
McDougall, the committee's report says: "It is
also significant that Senator McDougall re-
ceived considerable sums of money from the
company for travelling expenses. How one hold-
ing the high office to which he had been called,
as chairman of the Montreal Harbor Board,
member of the National Advisory Committee on
St. Lawrence Waterways, a Senator of Canada
and a member of the special committee of the
Senate to inquire into the development of the
St. Lawrence waterway, and, as he himself
stated, having a high regard for his public
duties, should allow his private interests to so
interfere with his public duty that he found it
necessary, speaking from his place in the Sen-
ate, to be 'ambitious and incorrect, it is dif-
ficult for your committee to understand. Senator

McDougall's actions in respect to the Beau-
harnois project cannot be too strongly condemned."
Safeguards have now been applied to prevent
any future manipulation of the Beauharnois
funds. Parliament took action following the
report of the select committee. The impression
left, however, on the public mind is one that
will not easily be eradicated, and especially so
as long as the men implicated in the transactions
noted remain in public life. So long as they do
the reputation of the Liberal Party in the coun-
try is severely tarnished. The marvel is that the
leaders of that party, and the press which sup-
ports it, have not called for a political house-
cleaning. Any postponement of such a process
makes it fairly obvious that the greed for cam-
paign funds supercedes the desire to observe
the ordinary decencies of what should be the
political ethics in any land well governed.

OUR JERemiahs

Courage and backbone are the essentials in
time of depression. It is poppycock to say that
the world is in a revolutionary stage and that
it can never be what it was before. It can never
be what people imagine it was because there is
change and decay or progress always. The prop-
hets of ill omen multiply in a time like this, and
the anomaly of it all is that these very prop-
hets were the optimists of former years. What
is wanted in these and all times is mental
solidarity. It would be infinitely better for the
world today if everyone would mind his own
business and cease talking and advocating quick
remedies for matters which are not fully under-
stood because of the bounds set to mental in-
telligence. In this talkative age one of the reasons
for depression is too much talking, and too little
attention to doing.

Millions upon millions of words have been
written on the present economic depression. If
a cascade of opinions could cause a rising tide
of prosperity we would be flooded in it by this
time. Most of the opinions expressed represent
a waste of time and misdirected energy, and in
that waste is represented a reason why depression
continues. The most distressing evidence of all
in the flood of talk is the lack of mental
backbone shown by those who express opinions.
Those who are disgruntled are those who do not
know the meaning of a stiff upper lip. To say
that the present-day economic conditions have
been tried and found wanting is to talk
the most arrant nonsense. Under those dispen-
sations the greatest war in history was fought,
and the world is better, far better, today than it
was in 1914. There is infinitely less poverty
abroad than there was after the Napoleonic
Wars. With the improvement which is being
effected all the time in conditions the marvel
is that anyone pays any attention to the Jer-
emiahs of the age.

The individuals who have tonic qualities to-
day are those who have learnt to make the best
of every bad job. Their training in this respect
gives them the power to make others realize, as
Chambers Journal says, "literally, and not only
abstractly, that every cloud has a silver lining."

A WELCOME VISITOR

The Bishop of London will always be a wel-
come visitor to this city and Island, if for no
other reason than because of his generous as-
sistance to the members of the Anglican com-
munity in this diocese. He officiated five years
ago at the laying of the foundation stone of
Christ Church Cathedral. The ceremony at-
tracted much attention, especially in the Old
Land, and with beneficial results. As president
of the British Columbia and Yukon Church Ad-
Society the Bishop has directed large sums to
missionary work in this province.

With a diocese situated at the heart of the
Empire, he has the Empire outlook and an in-
terest in Canada strengthened by family ties.
We wish that his example in visiting Canada
frequently might be followed by his brother
bishops. It would be good for this country and
for them. It is to be hoped that his present visit
will result in the early completion of the cathe-
dral tower which bears his name.

France is in excellent financial shape. The
statement of the Bank of France for the week
ending July 31 shows a gold reserve of £486,730,-
000. The notes in circulation have reached a
new record of 74,861,000,000 francs. The propor-
tion of gold to engagements at sight is 56.21 per
cent, or 21.21 per cent above the legal minimum.
The bank's deposits at sight abroad have been
increased in a week by 1,742,000,000 francs. The
exchange on London is 123.90 francs to the
pound.

No man can climb out beyond the limitations of
his own character.—John Morley.

The Weather

Meteorological Office, Victoria, B.C., at 8 p.m.,
August 22, 1931.

SYNOPSIS
The barometer remains high over Northern British
Columbia, and fine, warmer weather continues on the
Pacific Slope and eastward to Manitoba.

miles; clear.

Note and Comment

By R. B. D.

I never knew any man in my life who
could not bear another's misfortune per-
fectly like a Christian.—Pope.

A paradox. A paradox.
A most "perplexing" paradox.

In the midst of a world afflicted
by depression, consider the eni-
gmatic or paradoxical case of Japan.
If there are many unemployed Jap-
anese, the people of other parts of
the world are kept in complete ig-
norance of the fact. Yet the Jap-
anese are a fruitful people, for, ac-
cording to statistical authorities and
eugenic experts, birth control has
not been reduced to an exact science
in those not otherwise fruitful
lands, and the population is increas-
ing at a rate which would create
congestion in places where there
is said to be a congestion of popula-
tion. We are told that every month
the population of Japan increases
at such a terrific rate that the
foundations of a moderate-sized city
could be laid by the tiny new chil-
dren, provided time were given for
the performance of the miracle.

The paradoxical feature of the
case of Japan compared with the
cases of other countries is that in
other countries growth of population
has created problems of business de-
pression and unemployment, whereas
in the case of Japan increase of
population appears to have solved
or averted the problems of depres-
sion and unemployment. Compare
the case of Japan with the case of
the United States, or of Canada, and
try to account for the difference in
the existing circumstances. Japan
is a comparatively small country of
very limited natural resources, with
a teeming population. The United
States and Canada are both big
countries of almost limitless natu-
ral resources and with sparse popu-
lations.

If Japan were an Occidental
country governed under Occidental
political scientific methods, the
country would be considered over-
crowded with people, and measures
would be taken to reduce the popu-
lation through modern devices of
birth control or by emigration. The
rulers of Japan do not believe their
country is overcrowded with people,
and discountenance both birth con-
trol and emigration. Yet Japan is
either prosperous, or has managed to
conceal from the rest of the world
her state of business adversity.

There are a hundred and twenty
millions of people in the United
States, and if the density of popu-
lation there were equal to the density
of population in Japan there would
be five or six times that population.
There are ten millions of people in
Canada (estimated, because the final
figures of the census have not yet
been published), and if the density
of population here were equal to the
density of population over there,
there would be in Canada some-
where in the neighborhood of three
hundred millions. Yet the rulers
of the United States and Canada
consider the two countries over-
crowded, have stopped increases of
population by immigration, and are
deporting immigrants in order to
reduce the population.

If we consider the history of the
United States and Canada, another
rather paradoxical situation is re-
vealed. During the times when the
population of the two countries in-
creased very fast through immigra-
tion, if there was unemployment,
very little was said about it—it cer-
tainly did not create a perplexing
problem—and prosperity was gen-
eral that it covered the continent
like a garment. Do the circum-
stances of Japan, compared with
general circumstances, warrant the
deduction that there is a direct re-
lation between population and pros-
perity, that a country which in-
creases in population increases in
prosperity and that a country which
limits or tries to reduce population
invites adversity? Would it be logi-
cal to assume that the state of busi-
ness in a nation may be determined
to some extent by the capacity of
the population to consume the arti-
cles produced?

We frankly admit that to give
satisfactory answers to such ques-
tions is far beyond the range of our
capacity. The questions are sub-
mitted as a result of something pub-
lished about the preferred position
of Japan compared with the position
of other nations. If the Orientals
are peculiar, they have had a large
experience in business and eco-
nomics. If their ways are not our
ways, it would be rash to assume
that their ways are not better than
ours. They are undoubtedly
living closer to nature than we are.
In this matter of adjusting a teem-
ing and increasing population to dif-
ficult circumstances they have been
more successful than we have been
in adjusting a limited population to
most favorable circumstances. Have
we made mistakes in policy, and are
we suffering the consequences of
the mistakes we have made?

A woman reader writes: "With
reference to your interesting article
of thumb-sucking, in case you refer
to the matter again, there is a sim-
ple and most effective cure for it,
namely, painting the thumb fre-
quently with bitter aloes. A child
of mine sucked her thumb until six
years old, but with the advent of a
new nurse who tried this remedy,
she was very quickly cured of the
habit."

Mechanical food service, which
was installed by a small restaurant
in London, has not proved popular.

Letters to the Editor

No letter to the Editor will be inserted
unless the writer's name and address
are given. This rule admits
of no exception.

VICTORIA, A SEASIDE RESORT

Sir—Your leading editorial of
August 20 on the subject of making
Victoria a seaside resort will com-
mend itself to everyone.

The improvement of Beacon Hill
Park and its waterfront should be
one of the first things to consider
in a beautification of the Capital
City scheme, because a good park is
always a drawing card for any city.
Although many small improvements
have recently been added, yet the
park can be made much more of an
asset than it is to Victoria. Visitors
receive a good impression on their
arrival in this harbor, and if the
pleasant surroundings of the Par-
liament Buildings and the Empress
Hotel were backed up with a good
direct approach to the park it would
be a wonderful improvement. This
could be done by approaching by Doug-
las Street, at the Junction of Doug-
las, Superior, Blanshard and North
park streets, which is an appropriate
title. I am referring to an article
in a circus formation (say, like Pic-
cadilly Circus), which could
be continued a wide road leading to
the main park road. This would
wind round from the "Park Circus"
on the north side of the rocks, over
the present unimproved road track,
until it joined the park road.

Here, on the right-hand side, is
a wonderful belt of rocks which has
often been considered the position
for a public rock garden, but the
scheme has not been carried out.
A few trees have been planted there
in anticipation, by noted visitors. These
rocks are of such formation that
they could be made one of the show
rock gardens of Canada.

The road then leads to the sum-
mit of Beacon Hill and, unfortu-
nately, comes to a sudden end, with-
out even a convenient space for
turning, and no space for motorists
to park. Here one looks at a pano-
rama that is acknowledged to be
one of the finest in the world, but
no one can stop to enjoy it for more
than a few seconds without blocking
the road for other motorists.

To continue down the
hill, on the other side, was once
commenced, but work was aban-
doned. If this road were com-
pleted a great deal of material could
be obtained on the spot, by levels
and widening a space, not a small
strip but a really worth-while place
for motorists, to see the Olympics
from the summit, one would say, "Oh,
no. The roadway in any event is too
narrow, and if there were this
double approach to the hill it is evi-
dent, from the advantage taken of
the hill, that the road would be
the road that tourists would
like to take, and if, in ad-
dition, from there one looked down
upon the foreshore improvement,
of sloping cliffs, with seats, shrubs and
a promenade, it would create a feel-
ing of civic pride that would start
Greater Victoria on a campaign for
further water improvements.

There are, of course, many more
improvements that can be sug-
gested—a refreshment pavilion and
public tennis courts, for instance.
A good site for these (owing to
the sheltered position) would be in
the very large enclosure behind the
hill which is now apparently re-
served for the park horse and the
mountain goats.

Outside of the park question,
there is that of an auditorium,
which could be revived, and could
this not be made to include pro-
vision for skating and hockey?
Another attraction is an aquarium.
This could be built with less cost by
the C.P.R., which has a pipeline for
sea water already laid to the Crystal
Cave.

But the great thing above all
others is to keep and work for the
idea to make Victoria a seaside re-
sort, and in this connection it is
good to make an outdoor bathing
pool of Horseshoe Bay, it must be
borne in mind that the breakwater
would have to be constructed in a
suitable way to the wall on Ross
Bay, otherwise the floating logs in
a heavy sea would destroy it.

Some years ago a small, beautiful
bay existed where the Dallas Road
ended, but now it is used as a
parking place for cars. It was used
in this manner, at the suggestion
of the then existing Tourist Associa-
tion, but the construction was flimsy
and the sea brought in logs, and
on, which soon destroyed the
barrier and the bathing pool.

Lighting in the park would
be very desirable, but only if the
lights were laid underground. The
place would be ruined if any com-
pany were allowed to put up poles.
They are the total ruin of beauty.
In considering the attractions for
a seaside resort, it should be re-
membered that visitors to Victoria
come with the idea of getting a
thorough change, and seeing things
with British characteristics. They
like the gardens, hedges and bou-
levards, and the type of Old Country
seaside resort would appeal to them.
They like the hot dog stands, contain-
ing hot dog stands, callopes, ston-
ing galleries, etc., etc. These things
they see in abundance at the sea-
side resorts, and they like them.
In this matter of adjusting a teem-
ing and increasing population to dif-
ficult circumstances they have been
more successful than we have been
in adjusting a limited population to
most favorable circumstances. Have
we made mistakes in policy, and are
we suffering the consequences of
the mistakes we have made?

A woman reader writes: "With
reference to your interesting article
of thumb-sucking, in case you refer
to the matter again, there is a sim-
ple and most effective cure for it,
namely, painting the thumb fre-
quently with bitter aloes. A child
of mine sucked her thumb until six
years old, but with the advent of a
new nurse who tried this remedy,
she was very quickly cured of the
habit."

Mechanical food service, which
was installed by a small restaurant
in London, has not proved popular.

21, 1931.

UNEMPLOYMENT

Sir—The Premier is reported in
this morning's paper as saying that
the situation regarding unemploy-
ment is much too serious for party
politics.

The Bishop of London is reported in
the same issue as saying that
Christianity is the only solution to
the problem.

THE COLONIST IN LONDON

The Colonist may be procured at
the International News Stand of
Messrs. Selfridge & Co., Oxford
Street.

the world's difficulties in the present
serious state of affairs and that
toleration and less suspicion
amongst men is necessary for peace
and prosperity.

Mr. Mayer, K.C., had the temer-
ity earlier in the week to criticize
the economic soundness of the Gov-
ernment's unemployment scheme,
and Sir F. S. Barnard cordially and
sensibly agreed with him, realizing
that unless the wealthy classes place
their surplus wealth at the call of
industry the world is headed for a
smash.

Finally, I would humbly like to
call your attention to the fact that
I have been earnestly saying the
same things for the last six months
and advocating a non-party and less
extravagant form of government.
For so doing, I have been called a
crank, a freak, a prophet of gloom,
a traitor and a fool.

It is comforting to know that I
am now arriving in such good com-
pany.

T. GUY SHEPPARD,
1130 Summit Avenue, Victoria, B.C.,
August 21, 1931.

"LET GEORGE DO IT"

Sir—I would like to call the
attention of your readers to the fact
that I am referring to an article
in this morning's Colonist com-
plaining about the lack of support
for wealthy business men in the
title. I am referring to an article
written by Sir Frank Barnard for the
purpose of raising a fund for relief
of Victoria's unemployed.

The thought that immediately
occurred to my mind was: "Why
doesn't the committee get after the
employed work class and see that
they also do their bit?"
I am holding no brief for the rich,
but let us use a little of this "Brit-
ish fair play." Why on earth should
the unemployed be asked to contribute
to the unemployed and the wealthy?
What about the millions
who are employed and are really
benefitting by the depression in spite
of their pious utterances of con-
dolence and sympathy (when it
doesn't cost them anything)? Their
salaries and wages but double that
they formerly did. What about
those highly-paid civil servants,
especially teachers?

Who, bricklayers, etc., were
getting \$9 a day, the teaching pro-
fession "holled" their heads off
and finally, by a process of attrition
and mass "striking" they had their
salaries raised to the present high
level. Well, why can't all those
salaried people give a substantial
contribution to their earnings to the un-
employed?

Personally I can't see where there
is any sacrifice involved by giving
the unemployed a little of their
money. It is a matter of the slightest
sacrifice and inconvenience to them-
selves, they all hide behind the old
slogan—"Let the wealthy classes do
it, they won't miss it."

I have had sixty years' experience
of the working classes and the older
I get, the more disgusted I become
with their selfish, one-sided view-
point.

If they were willing to end this
depression why can't they agree to
share the work and give everybody
a four-hour day. Instead of a man
getting \$30 a week, he would work
twenty-four hours a week and earn
\$18, and the other four hours would
be a chance opportunity to have
money in his pockets.

Oh, yeah! he will answer, "why
don't the wealthy classes do it?"
The old vicious circle of passing the
buck. You may remember the out-
cry they made about the 1 per cent
tax on salaries.

Ye gods and little fishes! Im-
agine anybody in this time of war
and depression kicking because he
had to contribute a little of his
out of \$17 in order to help his
Government over a crisis.

Pine brand of patriots! That
same type has always got the price
to go to a walkout or something
equally elevating.

If we all shared equally in this
depression, the depression would
soon vanish.

Most of it, anyway, is purely fear;
people going home at night and
pumping their heads with the idea
of wearing shining suits, getting
their worn-out shoes patched, etc.,
in fact you can't pry them loose
from a nickel, waiting on somebody
due to do the shopping and starting
the ball a-rolling again.

No, let George do it!

MUEL MCKAY,
Blanshard Cabins, Victoria, B.C.,
August 22, 1931.

THE RED ROOF HOUSE

Sir—I hoped to have a further
opportunity of writing about Mount
Baker Park, but did not feel ready
as yet. However, the owner of the
new house leaves no option.

If she will recall my former letter
he will find that the epithet hideous
used there can in no way be con-
nected with her house. Having said
so much, the house again comes
within range.

A personal experience will be en-
lightening. Some years ago I was
the first to build on an estate com-
parable to the one under discussion.
There were to be building restric-
tions, but through one thing and
another these were not incorpo-
rated in the deed. Being a free-
born Englishman and knowing the
kind of house I wanted, that was the
kind I built. There was no an-
tagonism shown towards me, and
afterwards, when I found the type
of architecture meant to be used in
the development of the estate was
infinitely better than anything I
could conceive at that time, I was
utterly ashamed of myself. This
applies to Mount Baker Park.

Now I am jealous for my own
country and district; I wish it to be
distinctive. It is scarcely possible to
open a local paper without seeing
the editor or some feature writer
bragging about our wonderful
scenery. I ask myself are we doing
besides bragging? Lots of things;
none of them right. Here we have
something that can be developed in
a commercial way and yet be a joy
forever. In course of development
I had thought that the English half-
timber house would be appropriate,
but it would be too sombre without
shade. Myself, I am partial to the
Spanish colonial, but possibly an
adaptation of the French cottage
would be best. There must, how-
ever, be harmony. Mrs. Ella likes
her home. Had I money enough I
would buy the rock to the north of
her and build a house with wrought
iron columns, three sides and
with a shallow patio framing the
view from a huge plate glass window.
But here is the point; my house
could not be in keeping with the
one there already. Discriminating
people, many of whom would not
know why, would go away disas-
tressed; not overly anxious to come
back.

At present I only wish to point
out that enlightened people will not
countenance anything offensive, and
why should I or any Tom, Dick or

year. Continuing the plan of making each celebration different, the 1981 festival will feature Florence as the Giooco del Calcio, or medieval football, with its opening and closing processions.

GALES KEEP PLANE DOWN

Lindberghs Will Remain at Iturup Island Until Change of Weather

NEMURO, Japan, Aug. 23 (AP).—Although severe thunderstorms prevailed over the Southern Kuriles early today, dispatches from Col. and Mrs. Charles A. Lindbergh, fogbound at Shana, Iturup Island, said they hoped to continue their flight to Nemuro this afternoon.

The Lindberghs deposited their big black plane on what is known as Shannanuma, between the settlements of Shana and Bettobi, "nuna" meaning "a swamp or lake." Shannanuma is two and a half miles in circumference, allowing plenty of space for a take-off tomorrow, weather permitting.

KILLED IN CRASH

TOKIO, Aug. 22 (AP).—Colonel and Mrs. Lindbergh, coming here on a vacation trip, will not arrive in Tokyo until Tuesday at the earliest, even though the fog which stopped them today in the Southern Kurile Islands lifts to let them through.

Three naval officers were killed today in the crash of their plane at Kasumigaura airfield, where the Lindberghs will be formally received on their arrival in the capital under the auspices of the Minister of the Navy.

The Rhyming Optimist

By Aline Michaels

LOVE THAT LASTS

Romance paints a Love supreme,
Wrought of star-dust,
Glamour, dream;
Something fairer
Than Earth knows,
Something akin to
Dawn and rose.

But the love men
Hold most dear
Must be faithful,
Must be near
In the hours of
Need and stress;
Must know ways of
Tenderness.

Romance fills a
Twilight hour
With fragrance
Of a flower;
But the love that
Lasts must be
Deeply rooted
Like a tree.

City and District

Annual Picnic—The annual picnic of the local union of plumbers and steam fitters will be held at Beaver Lake on August 29. Those intending to participate are asked to meet outside the Scott Building, at the corner of Douglas Street and Hillside Avenue, at 10 a.m.

Spanish Unemployed—A meeting of the Spanish Unemployed Association will be held at Hampton Road ball park tomorrow afternoon at 3 o'clock. Several food speakers will attend, and questions and discussion relating to unemployment problems will be welcomed.

Travel Guild Party—A party traveling under the leadership of L. E. Welch, of the Travel Guild, is at the Empress Hotel. The tourists will remain over until this morning, when they leave for Vancouver en route East again by way of C.P.R., with stops at Banff and Lake Louise.

Unemployed Registrations—Fifty-one persons registered at the unemployment bureau last week. The total number of registrations to date is 561. This number is expected to be considerably reduced when the road construction programme gets under way.

Civic Meetings—A meeting of the City Council probably will be held on Tuesday night, when the city will consider a suggestion for a new plan of the city, and a meeting of the committee on the teaching staff and generally prepare for the fall term.

Plan Up-Island Tour—Directors of the Victoria Chamber of Commerce, at their meeting on Monday, decided to stage a tour of the islands of the group, and to invite members of the association and by the kind permission of Brigadier J. Sutherland Brown, C.M.G., D.S.O., officers of M.D. No. 11. A hearty vote of thanks was tendered Joseph North for undertaking the publicity work in connection with the event.

Non-Pensioners' Unit—Members of the Victoria branch of the Army and Navy Veterans' Association in Canada, who attended a smoking concert held in the clubrooms last night. Those who contributed to the programme were James Whedder, James Hodges, E. Livesey, James McGrath, A. Longdon, M. Lilley and Mr. George. Percy Fletcher accompanied the vocal numbers, and W. De Gruchy, chairman of the entertainment committee, presided.

Forest Fires—Forest fires in British Columbia reached the peak for the year during the past week with 208 new outbreaks reported by Chief Forester P. Z. Caverhill, with hazardous conditions prevailing in all districts. The official forecast of weather is for continued dry in almost all areas. Cariboo was reported fair and warm, Kamloops very hot and dry, and the southern interior extremely hazardous. Prince George forecast is for dry and windy, Prince Rupert, clear and warm, and Vancouver, hazardous. So far, 3,058 fires have occurred as against 1,621 at this time in 1930.

To Show Pictures—With the object of assisting in raising money for the unemployment relief fund, a series of pictures of the unemployed and the Bute Inlet district will be shown at the Chamber of Commerce on Saturday, August 29, at 8 p.m. The object of the views will be to illustrate the advantages of the tourist centre. A description of the lantern slides will be given by C. L. Hargrave. The shore line scenes, where the suggested Seymour Narrows automobile bridge could be constructed, will be among the pictures exhibited.

Building Figures—Permits issued for construction in Victoria for the week ending yesterday, amounted to only \$2,745, while permits amounted to \$10,000. Eight new homes will be built in Saanich at an average cost of \$1,100. In Victoria only one permit was taken out for a home. The remainder were for repairs and improvements.

Rotary Pageant—All those taking part in the big Rotary Pageant are asked to attend the following rehearsal: Monday night, 8 o'clock, at the Chamber of Commerce. Photographs will be taken on Tuesday night at a place to be announced at Monday's rehearsal. Full rehearsal on Thursday night, 8 o'clock, at the Horse Show Building, Willows.

Police Raid—Fifty-two Chinese were arrested in a raid on an alleged gaming house just east of Pan Tan Alley on Cormorant Street last night. According to police, the occupants were playing fan tan and Chinese lottery when the place was raided. They were charged with being found in common gaming house and released on \$20 bail each. Inspector J. T. Boulton and Sergeant Robert Ireland led the raid.

Equimall Council—Col. J. H. McMullin and Staff Sergeant Robert Owens, of the Provincial Police, are expected to attend the meeting of the Equimall Council tomorrow night, in connection with the suggestion of having the Provincial Police take over the policing of the municipality. Other matters to be dealt with by the Council will be the petitions submitted by ratepayers and employees of the municipality regarding the wage reductions made by the Council recently.

New Companies Formed—Five new companies with an aggregate capital of \$105,000 were named in the list of company incorporations in The British Columbia Gazette issued during the week. The new companies are: General Decorators, Limited, Vancouver, \$10,000; Clarendon Apartments, Limited, Vancouver, \$20,000; Main Hotel, Limited, Vancouver, \$10,000; Louis Wolf & Sons (Vancouver), Limited, Vancouver, \$50,000; and the Courtenay Hotel, Limited, Courtenay, \$10,000.

Wills Probated—Probates disposed of in the Supreme Court during the past week in Victoria were as follows: Thomas Gilman, Victoria, who died June 8, 1931, estate valued at \$14,081; Harold Buchanan McOleary, Victoria, who died February 3, 1931, total estate valued at \$138,544; Herbert Cookson, Victoria, who died May 22, 1931, estate valued at \$1,192; May Lydia Dr. of Seattle, who died July 27, 1931, estate valued at \$3,150; and John Rowley, Oak Bay, who died July 11, 1931, estate valued at \$22,856.

May Cancel Trip—P. B. Fowler, past president of the Victoria Chamber of Commerce, may not attend the convention of the Canadian Chambers of Commerce to be held in Regina next month. Mr. Fowler had intended going to the convention as a delegate and also as a delegate to the convention of the Canadian Clubs. The latter meeting has been postponed, and

POINT BARROW, Alaska, Aug. 22 (AP).—The ten-month-long ice siege was ended today and Point Barrow residents were enjoying fresh food, fresh eggs, and reading letters from loved ones in the South. After weeks of anxiety, in which the Arctic ice lock remained locked to these shores, a shifting wind yesterday opened up a lead and vessel ice-locked for weeks arrived. The first boat was a small tugboat, owned by Ira Rank, of Nome.

Within a few hours the coast-guard cutter Northland, the motorship Patterson, of San Francisco, and the Canadian steamship Baychimo, of Vancouver, B.C., anchored off shore. The Northland, with gasoline supplies for Colonel Lindbergh, arrived eleven days after he had left here for Nome.

MAIL IS LANDED
Dog teams went out over half a mile of Arctic ice to land mail and supplies from the ships. Meanwhile the sailing schooner C. S. Holmes, of Seattle, was twenty miles away from Barrow today. The Holmes carries practically the entire winter supplies for Point Barrow.

Both whites and natives began attempts to blast or break a channel through the ice from the lead to the shore to permit the Holmes to discharge its cargo. On its arrival, in the shortest possible time.

Change of Location—Dr. J. E. Watson Music Studio is now located at 617 Fort (over Nutshell Cafe). Phone E 8042 from 1 p.m.

A. N. Robertson, Barrister and Solicitor, announces that he has moved his offices to Rooms 8 and 9, Winch Building (Ground Floor).

DIFFERENT STORY NOW

Patrol Boat's Mate States Shooting of Captain Cluett Was Wanton

NEW YORK, Aug. 22 (CP).—Wilbur F. Tally, chief boatwain's mate and second in command aboard the United States coastguard patrol boat 145 when it fired on the Canadian runner, Josephine K. is under subpoena to appear before the grand jury next week and repeat his story that the shooting was wanton, inasmuch as Captain William P. Cluett had ordered his boat slowed down before he was fatally wounded. Arthur H. Schwartz, assistant district attorney, admitted over the long distance telephone today he had talked with Tally yesterday.

Tally's story, as reported in a copyright article in The Daily News, corroborated in several particulars the contention of the Canadian Government in its protest to Washington. Tally said the Josephine K. was outside the twelve-mile customs limit when fired upon; that solid shells were fired into her without the customary blank warning; that the runner, which was afterward found to be slower than the patrol boat was slowing down, and that he was not called to testify at the coastguard inquiry into the affair. Tally has since left the coastguard service.

A report from Washington today said the United States Government was awaiting the Canadian reply to the note of August 1, in which it was contended the coastguard's action was legal and justified.

PLAN ATTACK ON MOVIES COMBINE

Joint Action and Single Prosecution to Be Taken by All Dominion Provinces

Joint action by all provinces to curtail the single prosecution planned against the alleged motion picture combine in Canada recently attacked by Peter White, K.C., special federal government investigator, it was learned here yesterday. Provincial legal departments in Canada are combining their forces and will decide the course of action at a conference to be held at some central point, probably Winnipeg. It was stated at the Legislative Buildings here. Provincial legal representatives are anxious, they say, of avoiding a repetition of the Soloway-Mills prosecutions, which resulted in much overlapping and confusion. It is likely that one prosecution will be launched in one province, the cost to be borne by all provinces. Complete details are expected to be worked out in advance for agreement by provinces.

FLIGHT MAY FINISH ON AMERICAN SHORE

BERLIN, Aug. 22 (AP).—Willy Rod and Christen Johansen, German aviators, hopped off from Tempelhof airfield this morning for Lisbon on a flight which may carry them across the Atlantic to the United States.

An unnamed Portuguese was also aboard. They were flying a 300-horsepower plane formerly owned by Charles A. Levine, American aviation enthusiast. It is similar to that in which the late Baron von Huenfeld and his companion crossed the Atlantic several years ago.

Announcements

Mrs. Bridges, well known as a private teacher, will open, on September 1, a small class for general subjects, including at her residence, 862 Blanshard Street, Suite 4, a few delicate girls of slow mental development, for two hours daily. The number will be limited to five. The subjects will include reading, arithmetic, geography, dictation, composition, spelling, writing, drawing, singing. Mrs. Bridges, as the daughter of a medical man, is greatly interested in the thoughtful and healthy development of subnormal persons, who himself successfully treated several cases, is particularly suited for the task of instructing those children who find it difficult to keep abreast of their more normal school fellows.

When times seem difficult look your smartest—smile your bravest! Do not let us go and become careless. To know that one is looking one's worst is the last straw! We are justified in seeking any legitimate aid which will enable us to be cheerful and happy—for the ill effects of depression are incalculable. Miss Hanman, 503 Sayward Bldg., phone G 7642.

A private class will be started September 1 for delicate girls of slow mental development. The number will be limited to five. Hours of tuition, 10 to 12 a.m. For further particulars apply, Mrs. Bridges, Suite 4, 862 Blanshard Street.

Reopening Exhibition of Water-Color Paintings by Arthur H. Parker. Local scenery paintings; souvenir reproductions. Showrooms, Brandon Investment Co., corner View and Broad.

Former patrons will be glad to learn that Cornwell's Bakery Products have opened at 1611 Douglas (next Stewart's Shoes), where their well-known breads and cakes can be obtained.

Morning special at hairdressing parlors, David Spencer, Ltd., 9 till 10 o'clock: Marcel, 50c; finger wave, 50c; shampoo, 25c extra. No appointments for this special.

Mrs. Drake will take charge of four wedding parties, supper and private party. Equipment and efficient help. Provide dainty and delicious food always. E 3622.

Famous Banker Lands at Quebec

QUEBEC, Aug. 22 (CP).—Montagu Norman, governor of the Bank of England and "mystery man" of the British financial world, arrived in Canada today on the liner Duchess of York, which docked this morning from Southampton. The famous banker was traveling strictly incognito and his name did not appear on the liner's passenger list. Mr. Norman is traveling solely on business matters. It is understood that he will travel extensively in Canada but will make no public appearances and give no interviews. Housewife: "Don't bring me any more of that horrid milk. It is positively blue." Milkman: "It ain't our fault, lady. It's these long, dull evenings as makes the cows depressed."

Women's Work and Institutes

Bishop of London Goes for Cruise Of Saanich Arm

Glorious weather favored the outing arranged yesterday afternoon in honor of the Lord Bishop of London, who, accompanied by Bishop Schofield, Bishop Remington (of Eastern Oregon), J. E. Semmes, F. E. Winslow and Henry Dalby went for a cruise in the Cynthia as the guests of Norman Yarrow.

The party left the city by motor shortly after 1 o'clock, and went aboard the Cynthia about half an hour later. The afternoon was spent cruising about the inlet, the magnificent surroundings of which were greatly admired by the visitors between periods of trolling. Tea was served aboard the yacht, and about 7 o'clock the cruising party departed and returned to the city.

At 8 o'clock this morning the Lord Bishop of London will celebrate Holy Communion at the Cathedral, and will preach at the same place at 11 o'clock this morning and 7:30 o'clock tonight.

At 9 o'clock tomorrow morning he will leave by motor for Nanaimo, terminating his 14 days' visit here.

"Such a Relief—"

To know my entire washing is being properly cared for—beautifully cleaned in pure Ivory Soap with ten or more changes of water, which, of course, I cannot possibly do at home, is such relief—altogether I am very happy with my laundry service—make it your own. Simply phone G 8166."

COUNSEL

... In the Matter of Printing

Good press work alone does not make good printing. A knowledge of advertising is necessary for successful commercial work. The choice of the right type face to carry over the correct atmosphere, the use of cuts, the question of saying much or little, the problem of creating a distinctive layout to command attention... these are important points to be discussed and solved before your money is to be spent on printing.

It's our business to advise you on such matters... to absorb your ideas, to blend them with our own experience, before a stickful of type is set on your job.

Junior Symphony Will Benefit by Coming Concert

A benefit concert on Wednesday, September 2, for the Victoria Junior Symphony Orchestra will take place at the Shrine auditorium, commencing at 8 o'clock in the evening.

Of exceptional interest on the programme will be the vocal group by Mrs. T. A. Rickard, of Berkeley, Cal. Mrs. Rickard has been heard on numerous occasions at private drawing-room musicales both this summer and during previous visits to the city, and has never failed to instantaneously charm her audience.

The other part of the programme will be given by Miss Mary Bucklin, 'cellist; Miss Adele Bucklin, violinist, and Miss Dorothy Morton, pianist. Each of the instrumentalists will be heard in solo as well as in trio, and Miss Adele Bucklin will introduce the viola as well as the violin as a solo instrument.

So You Are Giving a Party

By HANNAH WING

Well, then, you will be looking for new ideas. How about these?

Pistachio Mousse—Quarter lb. Pistachio nuts, one tablespoon vanilla extract, one pint whipping cream, quarter teaspoon salt, half cupful confectioner's sugar.

Increasingly popular is the type of dessert which may be made the day before the party.

Shell and blanc nuts and put through the meat grinder twice. Blend them to a paste with the extracts. When cream is beaten stiff, fold in the sugar, salt, and the last the nuts. Pile lightly into individual cups, and garnish with slashed green maraschino cherries. Freeze by packing in ice and salt or in drawer of mechanical refrigerator.

Ice Cream Balls—One quart 10 per cent cream, 1 cupful sugar, 1 tablespoon vanilla, 1-8 teaspoon salt, 1-4 cupful chocolate shot. Add sugar, vanilla and salt to cream and freeze. Shape into two-and-a-half-inch balls and sprinkle with chocolate shot. You may, of course, buy the ice cream if you prefer.

Hungarian Coconut Drops—Two cupfuls sugar, 2-4 cupful hot milk, 2 tablespoons butter, 1-2 cupful of grated coconut, 2-3 tablespoon of grated orange or lemon rind. These are ideal for bridge refreshments. Dissolve sugar in the milk, add butter, and cook, stirring occasionally, to 238 F., or until a few drops make a soft ball in cold water. Cool the mixture until its centre is at room temperature. Combine coconut and grated rind with the mixture and stir until the mass is creamy and starts to hold its shape. Drop from a teaspoon quickly on wax paper, making individual candies. When firm, they may be tucked into paper cups.

Prune Diamonds—One cupful light brown sugar, 2 eggs beaten light, 1-4 cupful shortening, 1 teaspoon cinnamon, 1-4 teaspoon nutmeg, 1-4 teaspoon cloves, 1-2 teaspoon salt, 1-2 teaspoon soda, 2 teaspoons baking powder, 1-4 cupful flour, 1-2 cupful raisins, 1 lb. moist dried prunes, 1-2 cupful sour cream. Spicy and fragrant, these cakes are especially welcome in the lunch box. Cream the sugar and eggs with the softened fat. Sift spices, salt, soda and baking powder with the flour. Lightly dredge the broken nut meats and pitted prunes, which have been put through the meat chopper twice, with some of the flour. Add the cream alternately with the flour to the fat-and-sugar mixture. Mix all together thoroughly and stir in the prunes and nut meats. Pour into shallow pans, greased, and bake fifteen minutes in a moderate oven—380 F. Remove from the pans, cut in diamond shape and roll in sugar. They keep moist for a long time in a tin box.

Island Social Notes

Cumberland

Miss Carrie Richardson and Miss Jessie Smith are camping at Royston Beach for a week or ten days.

Mr. Copley Bennett, of Prince Rupert, is visiting friends in Cumberland and is enjoying some excellent salmon fishing at Point Holmes.

Rev. E. O. and Mrs. Robethan and family left Friday for their home in Chemainus, after spending the past few weeks here on vacation.

The home of Mrs. Preston Bruce was the scene of a very jolly party, when a number of young people paid a surprise visit to Master Wilfred Bruce. The evening was delightfully spent in contests, games and music. During the evening refreshments were served by Mrs. Bruce.

Mr. and Mrs. Jack Williams and family are spending a short vacation in Vancouver.

Miss Mary Walker, of West Cumberland, has accepted a position on the teaching staff of the Read Island public school staff.

Mrs. Margaret Richardson has returned to Cumberland after spending the past few weeks at Williams Beach.

Mrs. Clifford Skelton, of San Francisco, is spending a month's vacation with her parents, Mr. and Mrs. George Richardson.

The Ladies' Auxiliary of the Eagles held an interesting and profitable drive at its hall following the last regular business session. Ten tables of whist were in play, Mrs. Morrell and Mrs. Leroy Richardson being successful in winning the prizes, with consolation prizes going to Miss Denton and Mr. A. Hunter. Refreshments were served by a special committee of the order following the games.

Mrs. W. Jones, of Ladysmith, and Mr. W. Polkinhorne, of Nanaimo, were the guests of Mr. and Mrs. C. Polkinhorne for a few days this week.

Mr. and Mrs. Fred Bell and Miss Viola Bell have left Cumberland to take up residence in Vancouver.

Mr. J. Hallé and daughter, Margaret; Mr. and Mrs. Joe Hallé and family were guests of Mrs. Preston Bruce during the week.

Mr. Walter Hudson and Mrs. Agnes Bruce motored to Nanaimo on Thursday to meet Mrs. W. Hudson, who has been spending the past few weeks in Vancouver.

Mr. and Mrs. J. J. Potter will leave Cumberland next week for South Vancouver, where they will make their future home.

Deep Cove

Mr. and Mrs. Jack Ferrier, and family, have left for their home in Los Angeles, after having spent an enjoyable vacation at the home of Mr. and Mrs. W. O. Alder, Deep Cove.

Mr. Don Lee, and party, of California, found anchorage for their pleasure boat, the Melodie, in the waters near the Chalet. They are making a tour of coast waters.

Judge Calvin F. Hall, and Mrs. Hall, have returned to Seattle.

Mr. and Mrs. S. R. P. Ellis, and son, of Vancouver, have returned home.

Mrs. Hugh McLaren, and Master Ronald, and Miss Betty McLaren, of Vancouver, are registered at the Chalet.

Dr. and Mrs. J. P. Ellis, of Winnipeg, have left after a vacation spent here.

Colquitz

Mr. and Mrs. Charles Knowles, North Road, announce the engagement of their second daughter, Pamela Ida, to Mr. William Hill, Paine, son of Mr. and Mrs. F. Paine, Miller Avenue. The marriage will take place quietly in September.

Mrs. George Jones, Carey Road, has left to spend a holiday with friends in Vancouver.

Mrs. Robert Cochrane and Mrs. L. But, have returned from camping at Cordova Bay.

Mr. Roy McEliff is visiting his parents, Rev. and Mrs. W. McEliff, Wilkinson Road.

Keating

Mr. and Mrs. Jack Whitley, have returned home after spending a few days in Seattle.

Miss Beatrice Butler, and her two little brothers, Alexis and Morris, are spending a holiday at Duncan, with their brother-in-law and sister, Mr. and Mrs. Jack Crossley.

Mr. Fred Sutton, Central Saanich Road, has returned home after spending a holiday in Seattle.

Humphrey Butler is the guest of his uncle and aunt, Mr. and Mrs. R. Tait, Duncan.

Mr. and Mrs. A. Sutherland, and daughter, Dale, and Mr. Alex Sutherland, Sr., have returned home from Qualicum Beach and Up-Island points.

Mr. and Mrs. G. Warner, and family, have returned home after spending two weeks Up-Island and at Qualicum Beach.

Miss Nellie Styan, and Miss Betty Dunsell, of Victoria, have returned home after taking a trip up the West Coast.

Mrs. Austin Gale, Stelly's Crossroad, has left for Portland, where she will visit her brother-in-law and sister, Mr. and Mrs. C. King, for a few days. She will then go to Pendleton, Oregon, and spend two weeks with her mother, Mrs. R. O'Car.

Luxton, Happy Valley

A most successful card party was held on Saturday night at the home of Mrs. Heath, Happy Valley Road, under the auspices of the Happy

First Comedian: "Did you score a hit with your new specialty?"
Second Comedian: "Did I? Why, the audience gazed in open-mouthed wonder before I was half through." (Very wonderful! It is seldom that a First Comedian: "Wonderful! an entire audience yawns at once.")

Don't Handicap Their School Year

Science has proved the tremendous effect that eyesight has on the human body. A slight defect in childhood means lessened efficiency in brain and body.

It is Your responsibility to see that your children have every chance in the battle of life. Neglect now may hamper them throughout their whole career. Poor health, frayed nerves, definite ailments are traced direct to eyesight.

An examination now will detect any fault that is as yet an incipient trouble. Taken early, science can correct the defect and give your child the gift of perfect sight for life.

Have your children's eyes examined before they return to school.

Shower Held
Mrs. W. Lewis and Miss Doris Walsh were joint hostesses at a shower at the home of Mrs. Lewis, 111 Maitland Street, in honor of Mrs. H. Griffiths (nee Francis) and Miss "Nan" Johnston, a popular bride-elect of September. The room was decorated with a profusion of autumn flowers and pink and white streamers. The many gifts were concealed in a pink and white slipper, tied with a pink tulle bow. During the evening Miss E. R. Walker on behalf of the girls of the B.C. Telephone Company, presented Mrs. Griffiths with a handsome bridge lamp on the occasion of her resignation. After the gifts had been presented, a buffet supper was served by the hostess, assisted by Miss M. Lloyd. Among those present were Mesdames J. Marrs, G. Stewart, J. Johnston, H. Griffiths, W. Francis, R. Snider, R. Kattenbach, J. Stewart, M. Lewis and Misses I. Bradley, E. Walker, M. Surley, E. Warburton, L. Crowe, C.

Entertain on Yacht
Mr. and Mrs. Beaumont entertained the junior members of the Royal Victoria Yacht Club on a cruise to Port Angeles last week on their palatial yacht Discovery Isle, their guests including, Misses Joanne Campbell, Eileen Maloney (San Francisco), Dina Heutley and a friend, and Messrs. Jim Golby, Robin Porter, Bob Branson, Ronald Hotham, Carol Heutley, Douglas Robertson, Gordon Campbell, Ardes Johnston, John Arzard, Alec and Gavin Halkett. Several hours were spent sight-seeing before the return home the same evening.

Dance at Yacht Club
The junior members will hold a flannel dance at the Yacht Club on Wednesday, which will be one of the chief events of the holiday season, and is expected to be very largely attended. Tickets can be obtained at the Yacht Club or from any of the junior members.

At Qualicum Beach
Capt. and Mrs. Bloomfield, Capt. and Mrs. Browne, Mrs. C. Jasper, Mrs. D. Hood, Master G. Payne and Max Bloomfield have left for a holiday at Qualicum Beach and are staying at David Cook's cottage.

Entertain at Bridge
Mrs. Douglas Laird, of Winnipeg, who has been spending the summer months at King George Terrace, entertained informally at bridge last night with three tables of players.

Leave for Winnipeg
Mrs. James Lorimer, and her three daughters, who have been spending the past five weeks in Victoria, visiting Mr. and Mrs. John Grant, Cook Street, left on Friday for their home in Winnipeg.

On Cycling Tour
Miss Mary McFadden and Miss Edith Hemmoff leave today on a cycling tour of the island, which will take them as far as Campbell River. They expect to be away about two weeks.

Here From Vancouver
Miss Owen Stein, of Vancouver, is visiting in Victoria as the guest of Mrs. R. B. Mosher and of Mrs. J. T. McDonald at the Mount Edwards Apartments.

Leaving Today
Mrs. A. J. Blakey, and her son, are leaving today for their home in Los Angeles, after visiting her aunt, Mrs. R. Tomlin, Fifth Street, for the past few months.

Returning From England
Miss L. Bowron, who has been spending the summer holidays in England and France, sailed for Canada on Friday en route to her home in Victoria.

Returns From Motor Trip
Mr. and Mrs. J. Graham Graham have returned from a motor trip in the State of Washington. They

Is Welcomed to Victoria

MISS Helen Johnson, daughter of His Honor the Lieutenant-Governor Hon. J. W. Fordham Johnson and Mrs. Johnson, who will assist with the entertaining at Government House. Miss Johnson has been a frequent visitor to Victoria and has many friends here who are delighted to welcome her to the city.

University Women to Meet Soon

TORONTO, Aug. 22 (CP).—About 200 university women will gather in Ottawa for the triennial meeting of the University Women's Clubs to be held on August 25, 26 and 27. Miss Lella Scott, of this city, is to preside over the sessions.

Guest speakers at the annual dinner to be held on opening night will be Mrs. W. D. Herridge and Dr. Katherine McHale, president of the American University Women's Clubs. Possibility of making the Vocational Bureau in Toronto a permanent institution of the federation will be discussed, and the delegates will consider the advisability of appointing a lecturer available to all the clubs.

Another important matter to be brought up is the proposed establishment of a junior traveling scholarship of \$600 a year, to encourage students in graduate study and research. This scholarship would be in addition to the senior ones adapted to women graduates who have already spent several years in post graduate work.

Clubs and Societies

Girls' Club W.B.A.
The Girls' Club of the Women's Benefit Association will hold a garden party at the home of Mrs. Trowsdale, 631 Esquimalt Road, on Wednesday next, opening at 2:30 o'clock. The following are in charge of the various booths: Fancy work, Misses M. Clarke, B. Hunter, A. Hildbrand; candy, Misses M. and K. Bowen; ladies of the thousand pockets, Misses Malcolm; housewife, Misses A. Fisher and E. Edmonds. There will also be a home-cooking stall. The programme is in charge of Miss Florence Clough. Mrs. Richmond, of Los Angeles, will read tea. Donations may be left in care of Miss A. Reid at the Royal Dalry. A cordial invitation is extended to all members and friends.

Duncan W.A.
The regular monthly meeting of the Women's Auxiliary to Cowichan branch of the Canadian Legion, held in the Agricultural Hall, was well attended. Mrs. H. B. Ryall presided. Mrs. F. Fleiden and Mrs. A. Jack were thanked for having spring-cleaned the room. Arrangements were made to assist with the supper at the Legion dance on Labor Day. Mrs. A. Evans will supervise the supper-room decorations. Mrs. G. W. Brookbank was appointed supper convener. Mrs. J. E. Saunders and Mrs. D. Douglas held the close of the business session.

Ruth Chapter O.E.S.
Ruth Chapter No. 22, Order of the Eastern Star, will hold a fancy dress ball on Friday, September 4, in the Masonic Temple, Saanichton.

Daughters of England
The business meeting of Lodge Princess Alexandra, No. 18, Daughters of England, was held on Thursday in the S.O.E. Hall, the worthy president, Sister Gordon, presiding. Sister Lottridge, of Hamilton, was

TODAY'S RECIPE
BY HANNAH WING
APRICOT Tartlets—Pie dough, apricot preserves, whipped cream, red cherries. Roll pie dough thin and bake on the reverse side of patty tins or muffin tins. The dough should be well pricked with a fork to prevent puffing. When ready to serve fill the small pie shells with apricot preserves, top with whipped cream and garnish with red cherries.

WHAT ONE GIRL WORE
BY BETTY BROWNLEE
Many women go in for prints with dark backgrounds this season of the year. Printed silk suits are especially popular.

One girl who attracted my attention the other day wore a charming frock of soft plaid taffeta, the predominant colors being red, grey and white. The frock featured a turned down, scalloped lingerie collar, a cunning flared peplum and a flared skirt. Instead of the conventional jacket with this costume there was a tiny waist-length cape of black cloth. Shoes, gloves and hat were black, too.

A Clever New Paris Idea for Fall

Travel Tweed Dresses

**Demonstrating Why So Many
Say, "It Pays to Shop
at Mallek's"**

Smart people will feel decidedly indebted to Paris for evolving such a chic new style for Fall! . . . They're fashioned in the manner of suits, with separate blouses and novelty collar and cuff treatments. A quite fascinating diversity of new patterns and shades . . . in finest quality silk of just the right weight for chilly Fall days. Values like these demonstrate why so many people agree that it pays to shop at Mallek's.

ST. ANN'S Commercial Classes
The Sisters of St. Ann conduct a fully modern training department for young ladies entering a business career. The classes deal with every branch of commercial operations in which a girl may be employed, including the use of a Class Book, Bookkeeping, Stenography, Typewriting, and the general work of the average office.

The results of this course of training are apparent in the large numbers of graduates of St. Ann's who occupy responsible positions throughout the Province.

FASHION NOTE

JEWELLED Homes—The latest idea in clip-brooches is to wear a replica of one's home or favorite building on one's hat, belt or bag. At the famous Embassy Club, London, a well-known society woman was recently seen wearing a miniature replica of a Tyrolean pagoda carved in jade. A famous woman owner of race horses had a clip that represented a classic winner modeled from life. This latter was worked out entirely in diamonds.

Will Arrive by Plane
Mr. Jack Carey, of Powell River, is expected by plane from Vancouver today. He will be the guest of Mrs. B. C. Combe, Verrinder Avenue, for several days.

Entertain at Tea
Mrs. C. S. Waller, 855 Fox Street, entertained at a small tea on Friday afternoon in honor of Mrs. J. L. Dunn, of Port Alberni.

Visiting Parents
Mrs. A. E. Hill with her little daughter, Beverly, is visiting her parents, Hon. J. W. and Mrs. Jones, Craigdarroch Road.

Returns Home
Mrs. C. A. Watson has returned to Victoria after an enjoyable motor trip in the Chilcotin and Okanagan districts.

From Cowichan Lake
Mrs. L. Ashburnham, of Cowichan Lake, is the guest of Mrs. L. Austin-Leigh, St. David Street.

Lake Hill
Lake Hill Women's Institute will hold its eight annual exhibition on Wednesday, August 26, which will be opened by Mr. William Crouch, Reeve of Saanich, at 3 p.m. The show will be under the general direction of Mrs. Currie and her committee and the departments under their charge are as follows: Flowers: Mrs. Service; fruit, Mrs. Mercer, Sr.; Mrs. Mercer, Jr.; vegetables, Mrs. Currie; needlework, Mrs. Porter; domestic products, Mrs. Peddie; children's classes, Mrs. Moodie, Mrs. Walton; door, Mrs. Williams.

Tea will be served in the institute room in charge of Mrs. Simmons. Mrs. Sheritt will have the home-cooking stall and a "white elephant" table will be in charge of Mrs. Moodie. The show will be held at Lake Hill Community Centre, Quadra Street and Lodge Avenue.

Jean—So you married your employer. How long did you work for him?
Jane—Until I got him.

Women's Institutes of Vancouver Island
SOUTH SAANICH
The South Saanich Women's Institute held its regular monthly meeting at the Temperance Hall, East Saanich Road. In the absence of the president, Mrs. Alex Sutherland, Mrs. A. Hafer took the chair. It was arranged to start card parties in September; the wool bees will also be held. Mrs. C. H. Styan and Mrs. B. Nimmo were appointed delegates to the meeting of the Friendly Help Association, in aid of the unemployed. The wool committee, which was made by the ladies of the institute, will be on exhibition at the Victoria Fall Fair. Through the courtesy of Mrs. J. L. Mosher, Oakes Road, Saanich, Mrs. garden party and sale of work will be held on her grounds on Wednesday afternoon at 2:30 o'clock. All members and friends and residents of the district will be welcome. There will be tea and reading and other attractions. The committee are as follows: Programme committee: Mrs. J. Patterson, Mrs. C. H. Styan; conveners for tea: Mrs. R. Nimmo, Mrs. H. Lawrie, Mrs. A. M. Hafer, waitresses: Mrs. A. Hafer, Nellie Styan, Alice Styan, Gladys Turner, Doris Mitchell, Mrs. B. Bickford; sewing staff: Mrs. D. Besmont, Mrs. Oakes; home cooking, Mrs. L. Hafer, Mrs. E. J. Lawrie; plant staff: Mrs. F. Young, Mrs. W. D. Mitchell; ice cream staff: Mrs. W. S. Butler, Mrs. W. Karsney; tea and reading: Mrs. G. Warner.

GARDEN PARTY AIDS VETERANS

A garden party was held yesterday afternoon at the home of Major and Mrs. H. Niven, Head Street, Esquimalt, by the Women's Auxiliary to the Army and Navy Veterans' Association, Mrs. Alcock, the president, being responsible for the general arrangements.

Mrs. Walter C. Nichol opened the fête, and Mrs. Alcock and Mrs. Niven welcomed the visitors. During the afternoon the home cooking stall, in charge of Mrs. A. E. Moody and Mrs. H. Lane, was patronized; Mrs. F. B. Rendall was in charge of gate receipts; Mrs. W. Spaven, Mrs. A. M. Young and Miss Muriel Young were at the superfluous stall, and tea was served by Mrs. H. Kent, Mrs. Purdew and Mrs. Walters. Miss Aggie Spaven sold ice cream and soft drinks, and Messrs. Luck and Kinross Happle supervised the coconut stall.

FINE PROGRAMME
During the afternoon the Victoria Boys' Band played an attractive programme of musical numbers, and a number of little dancers delighted the visitors. Miss Maile Griffin, a pupil of Miss Foxlee, gave a clever acrobatic dance, and little Miriam Schwabe and Master Ian Gibson, two exceptionally clever dancers, performed a Mexican number. Both are pupils of the Russian Ballet School. Miss Clough's pupils, Robina Norton and Jeanne Osgood, were charming in their "Flirtation" number. Ethel Gillis and David Webb danced the gavotte with old-world grace, and Robina Norton and Dan Platter gave as their dance number "Mood Magic." Pat Cliff and Jack Taylor were warmly applauded in their "Adagio."

A comic dog show was one of the attractions of the afternoon, many children with their pets taking part. Mrs. Nichol was clearly a beautiful bouquet of gladioli by Helen Mary Kent and Master Harvey Alcock.

The proceeds of the fête will go towards a fund for the needy disabled and unemployed veterans.

Old Mount Aniakhak Gouged and Crumbled By Gigantic Volcano

Mighty Explosions in Famous Mountain in
Alaskan Peninsula Rocks Earth for Miles
Around—Figure of Vast Area Com-
pletely Changed by Huge Craters

By REV. BERNARD R. HUBBARD, B.S.

Head of the Geology Department of the University of Santa Clara

ANIAKHAK crater erupted this year. It was the most terrific eruption since Katmai erupted in 1912. Unlike Katmai, though, whose eruptions were not popularly known for several years after the eruption, and then only because the highly financed expeditions of the National Geographic Society were able to bring the notice of the public to what would otherwise have been only another Alaskan volcano erupting, Aniakhak was explored this year while still erupting and accounts are now appearing while the region is still hot! Generous courtesies of the Pacific International Airways allowed valuable air surveys to be made, while my rugged student party took their beatings like men in traversing the difficult region on foot and under pack for over 350 miles.

Aniakchak with its huge base 100 miles in circumference, spreads all over the central section of the Alaska Peninsula. The nearest native village is Meshik at Port Heiden, on the Bering Sea, and from its cluster of deserted barabaras and shacks the volcano rises to an unobstructed view. May 1 of this year dawned clear and bright on the Alaska Peninsula. Winter had departed from the shoreline and the snows had begun to retreat up the lower slopes of the mountains, but winter still maintained its icy grip on the interior.

The trapping season was over and the handful of hardy men who seek a livelihood from the furs of this section had either departed to sell their catches or were preparing the rushing boats for the summer run in Bering Sea. Among the latter was Frank Wilson, one of the few inhabitants of Meshik. He was scraping and caulking his boat when an exclamation of surprise called his attention to his little daughter Mabel, playing in the sand nearby.

ing in the cloud and coming from the earth to make a truly fear-inspiring sight.

THUNDER ADDS TO DIN

Thunder added its din to the almost constant explosions of the erupting volcano, and the sides of the mountain reverberated to the sound of falling rocks. A few sound soon aroused the already terrified people of Meshik who pebbles first the size of peas and then as large as eggs beat fast on their houses. The eruption lasted uninterruptedly until May 11, when a final terrific explosion shook the surrounding country and sent rocks and ashes into the air that made it pitch dark for several hours at noon on the opposite side of the crater at distances sixty miles away from the crater.

Wilson left Meshik after the last explosion on May 11, and went by Bristol Bay, where he met the author and narrated the story of the eruption, had the paint scraped off his boat and his engine ruined pushing his way through more than five miles of floating pumice the size of water buckets. On May 20 rumbling from the volcano and local earthquakes followed by an ascending smoke indicated the last major explosion of Aniakhak.

ASHES FALL ON SHIPS

Ashes fell on vessels plying both in the Gulf of Alaska and in the Bering Sea, and one of the Government ships heading towards the Peninsula had an interesting account to narrate.

While still a great distance from land and while trying to pick up a light for observation a companionous flickering light drew the instruments, but its position was far from any light marked on the charts. After several calculations by different officers the consensus of opinion finally identified the glow not as a marine light but as coming from the geographical position of Aniakhak.

The ashes of Aniakhak, blown high into the air and carried by the wind, settled in conspicuous depths far from the coast. At Chignik, sixty miles south, they fell a pound per hour to the square foot.

150 MILES AWAY

A similar distance north at Ugashik they fell even heavier, and at Kodiak Island, Katmai National Monument, Nushagak and points over 150 miles distant depths of ash to a quarter of an inch covered everything. Even in the interior of Alaska ashes fell along the Kuskokwim, 300 miles away, and probably investigation would show effects of the ash fall at even greater distance.

ANIMALS LOSE LIVES

As is usual in the volcanic cataclysms of the Alaska Peninsula volcanoes, great loss in animal life resulted from the explosion of Aniakhak. The most distant and ferocious were the reindeer in the interior back of Nushagak. It was fawning time, and when volcanic ash covered the feed the reindeer started to migrate, leaving the helpless young to perish. Reindeer and caribou ground their teeth down to the gums from the grit in the grass, and died. Dead ewas and geese floated down the rivers from lakes of the Alaska Peninsula, and cutting them open revealed the cause of their destruction, entrails full of volcanic ash. Hibernating bears, squirrels and small game living inside the crater probably were consumed in the first great explosion.

So much heat suddenly liberated as well as millions of tons of tiny ashes filling the air caused an interesting phenomenon shortly after the eruption. Clouds condensed rapidly all over the region and raindrops forming about the tiny ash bits started falling.

LITERALLY RAIN: 23 MUD

Turning the ashes to mud it literally rained mud for hours, making the snowfields and glaciers black as ink and causing the surrounding country to look as though covered with a huge funeral pall. The ash mud was sticky, too, and insisted on getting into every crack and corner and penetrating the closest woven cloth.

Chisholm, Douglas and Regan, my student party of this year, arrived at Chignik shortly after the middle of May, when everything was still in a turmoil from the effects of the eruption. The definite news of the actual eruption had reached the outside world other than another Alaska volcano had exploded in a major eruption. Aniakhak was suspected and Chisholm sent me a radio message to Holy Cross where I was chafing under the forced inaction of waiting for the mighty Yukon to break up and let the ice out so airplanes could land.

FLIES DOWN KUSKOKWIM

Finally, on June 2, Chief Pilot Harry Blunt, of the Pacific International Airways of Alaska, with copilot Al Morsen, flew a Fairchild plane to Holy Cross and started me off on the pioneer flight down the lower Kuskokwim and along Bering Sea. After many adventures we landed at Chignik. A partial and rather dangerous reconnaissance of Aniakhak from the air revealed little but smoke and gas billowing an immense black maw of the still erupting volcano. For greater safety we put off further aerial observations until later on in the summer, determining to investigate the volcano first on foot. By plane and boat our party and equipment were transported from Chignik to Kujulik Bay, the nearest approach on foot to the volcano. Blunt then flew part of the equipment to Meshik Lake, on the flank of the volcano, and left for his headquarters at Anchorage, to return in a few weeks' time.

With sleeping bags, cameras and food for a few days the three students and I started from Kujulik Bay to traverse the coastal barrier

Boiling Lava Rising in Volcano

THE above picture, taken by Father Hubbard from the very rim of the huge crater, shows an enormous mass of lava being pushed up out of the bowels of the earth under terrific heat and pressure. Escaping gases may be seen rising from the edge of the lava bed. Members of Father Hubbard's party can be faintly observed on the opposite side of the crater. Soon after this picture was taken the party was forced to flee from the scene because of the dangers of the increasing gases.

mountains, across the Aniakhak River Valley and gain the rim of the volcano. The air was dry and a slight breeze blowing.

WISHED FOR CHANGE

We soon wished that it would change to rain. Every time our foot descended on the mossy tundra, clouds of volcanic ash rose up, filling our eyes and ears and throat, and making our hair like wire brushes. Dust whirlwinds set in motion by cross-currents from the numerous mountain canyons sent myriads of miniature tornadoes into the air, making the setting appear more like a scene in the great American desert than an Alaskan landscape. Black, rocky, open spaces were crossed, deep gulches laboriously climbed, dense alders struggled through and mountain streams forced for many hours. I was real proud of my party.

The pace was steady and the going tough, and though the two younger boys fell asleep from sheer exhaustion nearly every time we stopped for a few minutes' rest, they struggled on manfully until ten o'clock at night, or rather at Alaska daylight, when we made camp at the foot of Aniakhak. We covered close to thirty miles that day.

START TO CLIMB VOLCANO

Next morning we started the climb to the volcano rim. Winding through canyons, crossing slopes of volcanic ash that rose in choking clouds, we struggled along the loose ground until a long ridge was all that separated us from the highest point of the rim near the rocky prominence named Black Nose. Black nose I could not see the appropriate name, as Black Nose, though its sheer cliffs were of black basalt and obelisk, yet its shape, no less than its name, seemed to suggest a black nose. It was the first of a series of black noses, and even the clouds that hovered about it looked black in the distance.

Climbing to the crater rim we were going through a valley of death in which not a blade of grass or water, nor a bird or bush of moss broke through the thick covering of deposited ash. Black clinders climbed under our feet and slid away. It was like walking on wheat in a huge bin, and equally difficult.

Jutting rocks along the ridge necessitated more climbing, but this was far more preferable than the sliding clinders and choking ash. A few hours of hard work and but a few feet separated us from the coveted goal, the rim of Aniakhak and the first glance into the great abyss.

WAITED FOR REGAN

We waited for Regan to catch up as troublesome shoes had caused him to come up slowly. Different emotions surged through us, all of them different. Douglas and I were tense for the first time and were tense for the spectacle. Chisholm and I were to be lost after having lived in Paradise. Found the previous year. Kneeling as is our custom on such occasions, we said our Hail Marys and then crossed ourselves and crawled cautiously to the edge.

NO CONTORTED LAVA FLOWS

No contorted lava flows pleased with the sinuous windings of their cooling mass. The Avernia's snowfields broke the monotony of the huge crater walls. No contorted lava flows pleased with the sinuous windings of their cooling mass. The Avernia's snowfields broke the monotony of the huge crater walls. No contorted lava flows pleased with the sinuous windings of their cooling mass. The Avernia's snowfields broke the monotony of the huge crater walls.

Beyond the moving hill a seemingly bottomless pit had been blown out of the crater floor and smoke was pouring from its top. But the terrible blackness of it all got on our nerves.

VISIBILITY WAS IMPAIRED

Visibility was none too good as it had not rained for a few days and dust, whirlwinds danced along the crater floor like some mad ghosts that danced their Devil's Ball in the deadly smoke and gases of this

prelude of hell in Aniakhak. A good strong whiff of hydrogen sulphide brought us to our senses, and choking we dodged away from the rim of the crater to where a ravine wind outside the volcano cleared the air. None of us said anything. There was nothing to say. It was all see, and each one felt himself as in the grasp of a chilly nightmare that he could not shake off. Nor were we the only ones that sought the rim of Aniakhak that day.

BIG BROWN BEAR

And bear it was; a big brown bear less than fifty feet away. He seemed as surprised as we and halted in indecision. We didn't move either, but each one mentally picked out a convenient spot on the rim, preferring to jump over and avalanche down a thousand feet rather than mix it with Alaska's most formidable carnivorous monster. We had foolishly left our rifles in camp, not expecting such a encounter. The big bull bear snuffed at us and stood up, still maintaining his position. I thought it was time to start something, so I took my ice pick and started clinking a rock on it. The noise irritated the bear and he turned and ran. Up the snowfields and rocks he went, his rasping breath and howls showing the eagerness of his retreat.

SANCTUARY FOR BEARS

The floor of the great crater had been the sanctuary for many generations of bears, and with its abundant food, its salmon and its mineral springs was evidently much to their liking. The eruption had consequently evicted from their homes but no doubt been quite a puzzle to the crater bears, and bent on investigation they had sought the rim along the same route we had used.

Greatly relieved by the bear's departure, we returned again to the crater edge and endeavored to take a few pictures in spite of the poor visibility. Seeking a point of rock above a precipitous snow-filled draw leading from the inside of the crater, Douglas and I were climbing ahead when a peculiar sound coming from the draw arrested our attention. It was a sort of whimper and howl combined. It was followed by heavy rasping breathing. Douglas peered over the edge as I crawled beside him.

ONE GLANCE WAS ENOUGH

One glance was enough. A tiny cub brown bear was perched on a ledge of rock not twenty feet below us and his lovely ten-foot-long mother was climbing up to her darling. She saw us at the same time that we saw her and with a flash of teeth and a growl made a half lunge up the cliff in our direction. Changing her mind about the direction she made for the cub to see if it was all right. We did not wait for anything more. "Run," I yelled to the boys, and we streaked across the ash-covered glacier expecting every minute to see in a hurried backward glance the head and shoulders of an irate mother bear coming up over the cliff. She stayed with her cub, however.

THREE BEARS ON THE SAME SECTION

Three bears on the same section of Aniakhak's rim as we chose for observation were just about too many, so regretfully leaving our scientific observations and photography for another day, we hastened toward our camp at the foot of the volcano. Satisfied with our reconnaissance, we trekked the long miles back to Kujulik Bay to collect our equipment and return for a thorough exploration of the inside of Aniakhak.

Adventures in the air and in the interior of the erupting volcano marked the next few weeks. Loaded with specimens of mineral forms, gases and mineral waters and with hundreds of still photographs, we at length brought our summer to a close. Next Spring will see a continuation of our study of the world's largest crater.

I feel particularly attached to the Aniakhak volcano. It is the largest, and I like it for its things. Also it marks one of my most successful attempts at scientific prediction. In an Associated Press dispatch of January 30, after I had spoken to the Chamber of Commerce at Seward and explaining the recent earthquakes there, had clearly stated that the centre of the Alaska Peninsula, Aniakhak or Chignik, would have a major eruption this summer as great as Katmai's, the rest of the world was duly informed that I was not afraid to call my shot! Aniakhak did the rest!

Mistress (whose radio is out of order)—"Oh, Jane, we were wondering if your young man knows anything about electricity?" Maid—"Oh, yes, ma'am. He always disconnects the bells in the kitchen the nights he comes here."

School Days/ Is your boy's eyesight normal?

Bob's parents knew the tremendous importance of normal eyesight to children. So they had Bob's eyes examined. The slight defect revealed was corrected easily (and in time), by the eyeglasses prescribed.

Hence Bob's quick answer—his better report cards.

Have Your Child's Eyes Examined!

A Bargain in Shrubs

For Fall delivery we offer a little collection of six shrubs ordinarily priced at \$4.50, for \$2.50, and particularly interesting to new home builders. They include: a lavender, value 50c; a rosemary, value 50c; a Berberis, value \$1; a lonicera, value 75c; a bridal wreath spirea, value 75c; and a May tree, value \$1. All are fine plants. They must be ordered immediately.

tiveness. Now what about giving laxatives—castor oil, epsom salts and so forth—when the pain for which they are given happens to be appendicitis? Dr. Bower reports that of 166 cases in whom they were able to find out whether or not a laxative had been taken after the pain started, 131 had peritonitis. Of this number 124, over 98 per cent, had taken a laxative. What do the above results teach us? That delay in operation, and the taking of laxatives, were the cause of most of the deaths. Remember, in acute appendicitis, that there is only one symptom always present, and that is pain. In nine cases out of ten, there is tenderness in the region of the appendix. So if you have pain in the abdomen—when the pain for which they are given happens to be appendicitis? It is my aim to make my pupils think for themselves. One day I was trying to make them deduce the meaning of "Transcend." To the question, "What does ascend mean?" I received the following reply, "Go up." "Descend," they informed me, was "go down." So, coming to the crucial point, I demanded: "Then what does 'transcend' mean?" One boy became wildly excited so I asked him to reply. "Stay where you are," he declared triumphantly!

UNION TO MEET SEPTEMBER 10

Delegates to Canadian Municipalities' Convention Will Gather at Vernon

Fairly complete details of the programme prepared for the convention of the Union of Canadian Municipalities at Vernon have been announced. Business will begin at 10 o'clock Thursday morning, September 10, at the Scout Hall, and will continue until the following Saturday.

The convention will be opened by the president, M. D. Cormier, Mayor of Edmonton, N.B., following which Mayor L. L. Stewart will deliver an address of welcome. J. Frendhomme, K.C., city solicitor, of Winnipeg, is to reply on behalf of the delegates.

The report of the secretary-treasurer and the appointment of committees on resolutions will be the main business completed in the first morning's session.

In the afternoon, Fire Chief C. W. Thomson, of Vancouver, will speak on "Modern Fire Protection." Mayor H. W. Cater, of Brandon, will give an address on "Municipal Taxation," and Brigadier-General M. L. Hornby, of Lethbridge, is scheduled to speak on "A Plan for British Columbia Community Settlement of Canada."

The reports of the standing committees on legislation, traffic and fire protection will be made by H. W. Cater, P. McCordick and J. M. Willard, respectively.

BANQUET IN EVENING
At 8 o'clock in the evening the delegates will be the guests of the Mayor and Council of Vernon at a banquet at which Hon. S. F. Tolmie, Premier of British Columbia, will be the main speaker.

The sessions will resume at 10 o'clock the following morning, when Dr. W. S. Galbraith, of Lethbridge, will speak on "Public Health." Hon. J. Hinchin, Minister of Education, and Hon. W. A. McKenzie, Minister of Mines, will be the other speakers of the morning. The former's subject has not as yet been announced, but particularly interesting should be the latter's topic, "Unemployment."

In the afternoon, Robert Baird, Inspector of Municipalities for British Columbia, will deliver an address on "The Inspection and Accounting of British Columbia Municipalities."

The reports of standing committees on municipal accounting, public utilities, employment, and finance and membership will be delivered at the same session.

A civic dance is scheduled for Friday evening.

ELECTION OF OFFICERS
Saturday morning will be given over to the reports of committees on resolutions and to the election of officers.

On one of the days of the convention the delegates will be entertained at a luncheon given by the Kinsmen Club at Kalamalka Lake. A trip around the city and district is being arranged and efforts will also be made to extend aeroplane privileges to the visitors.

The noon hour on Saturday, it is anticipated, will practically bring the convention to an end.

On September 14, 15 and 16 the convention of British Columbia Municipalities convenes at New Westminster and it is expected that many of the visiting delegates will proceed on from Vernon, so as to attend this latter gathering and pay a visit to the Coast as well.

CULBERTSON on CONTRACT

by Ely Culbertson
World's Champion Player and Greatest Card Analyst

PENALTY DOUBLE AND DEFENSIVE PLAY

In the approach forcing system it is the accepted convention that a double of an adverse bid is for penalties. (That is, it is made with the expectation of defeating the contract.)

When:
1. Partner has previously bid—be it only a suit bid or one, or
2. The doubled bid is at least two trump or a three bid in a suit.

There are safeguards placed about the procedure of doubling, which when intelligently used are certain to bring profitable results. These safeguards are:

"The Two Trick Rule": Any penalty double must be based on expectancy to defeat the contract by two tricks. So-called "sporting" or "free" doubles on a margin of but one trick are never advisable.

"The Trump Trick Rule": Penalty doubles of suit bids below a game contract should not be made unless at least one trump trick is held. This rule is a valuable safeguard against the inevitable rocks of distribution.

Having in mind the qualifications above stated, the penalty double rule can be stated as follows:

By adding the minimum number of honor tricks shown by partner's bid to honor tricks held in player's own hand and subtracting the total from thirteen, the balance will show the trick-taking limits of the opponent's contract. If now the player expects to penalize the opponent by at least two tricks—the minimum margin of safety for any double—he may double when not expecting a greater gain at own bid. This all-important rule definitely solves the problem of doubling and is based on strict adherence in partnership bidding to the Standard Table of Honors and minimum requirements for various bids—especially opening bids.

The hand below, in which Theodore A. Lightning, one of the world's ranking experts, played, is an illustration of the soundness of the rules above given. West's overall of South's opening bid, considering the score, was possibly a trifle optimistic, but not by any means as unsound as the result appeared to indicate.

Both sides vulnerable; South Dealer.

MODERATOR TO MEET LEADERS

Rev. Dr. Oliver Will Confer With Church Heads on Emergency Relief

TORONTO, Aug. 22 (CP).—Rev. Dr. E. H. Oliver, of Saskatoon, Moderator of the United Church of Canada, is coming to Toronto early in September to confer with conference and presbytery leaders and with the National Emergency Relief Committee regarding the situation in the West.

Dr. Oliver had motored 2,000 miles through the dried-out areas of southwestern Manitoba and southern Saskatchewan to meet ministers and laymen while studying conditions. He definitely classes being seriously affected by the drought and dust storms.

At the end of July after his first tour of the grain districts, Dr. Oliver appeared to United Church leaders for immediate planning to relieve the situation. The idea of a National Emergency Relief Committee for the United Church of Canada was then proposed. Assured of adequate backing, he resumed his tour of the West. The Moderator is now in a position to report on the latest conditions in his conferences in the East.

"My son has the makings of a stage comedian," "You mean he gets hold of all the funny magazines"

What Today Means

"LEO"
If August 23 is your birthday, the best hours for you on this date are from 9 a.m. to 10:45 a.m., from 2:30 p.m. to 4 p.m., and from 10 p.m. to 11:30 p.m. The danger period is from 5:30 p.m. to 8:30 p.m.

Unexpectedness will be the keynote for August 23. Events are foreseen which will upset previous plans. Difficulties will arise in married life, though this danger threatens women rather than men. Conventions may be forgotten for the moment, and a series of regrets will follow. Not a restful Sunday.

Children born on this August 23 will be successful in pursuance of their character. They will be dominating leaders, and will gain their ends through self-assertiveness more than through tact and diplomacy. They will have a love of approbation.

If born on August 23, the fate have given you one outstanding characteristic—the power of concentration. You will achieve success, not by brilliance, but by luck, and by keeping your will and your efforts steadily focused on one purpose. You do not scatter your thoughts or your energies. Things are stamped on your memory with such force and accuracy that you can recall events or facts with infallible accuracy.

You are shy, lonely, and an inarticulate person. With you there is no effort of self-advertising, or no effort to force your personality. You are loath to ask favors from others, and rather than put yourself under an obligation, you often turn down golden opportunities for advancement.

HER HUSBAND TEASED HER

But not for long!

"I started taking Kruschen Salt for biliousness, and for the last two years I have been perfectly free from an attack. Now I continue to take them, as I find they keep me in perfect health. My husband used to joke about me taking Kruschen Salt, now he takes them himself, so do my children. My sincere thanks."

—Mrs. G. P.
When your gastric or digestive juices refuse to flow, your food, instead of becoming absorbed into your system, simply collects and ferments inside you, producing harmful acids and gases which give rise to biliousness, heartburn and flatulence.

Kruschen is a combination of six mineral salts, which goes right to the root of the trouble. It first stimulates the flow of gastric and other juices to aid digestion, and then insures complete, regular and unflinching elimination of waste matter every day. And that means a blessed end to biliousness, and a renewed and whole-hearted enjoyment of your food without the slightest fear of having to pay the old painful penalty. (Adv.)

to recharge their batteries while running by means of live rails along parts of the line.

Gert—What was your first impression of Alice?
Bert—I thought she was a girl after my own heart.
Gert—As a matter of fact, big boy, she is.

BATTERY TRAINS SUCCESS
Tests so far made in Ireland of running railway trains by means of power supplied by a battery are declared to have been a success, although full power from the batteries was not used. Further full-power tests are to be made, and it is expected that a train with a sixty-ton load will attain a speed of fifty miles an hour. The battery is the invention of Dr. James Drouin, the Irish scientist, and has aroused great interest throughout Europe. The batteries can provide power for sixty miles of operation, and when the trains stop at a station they can be recharged in ten minutes. It is proposed, however, to enable trains

to recharge their batteries while running by means of live rails along parts of the line.

Gert—What was your first impression of Alice?
Bert—I thought she was a girl after my own heart.
Gert—As a matter of fact, big boy, she is.

Last Call for Snapshots

Make them today . . . Mail them at once . . .
Contest closes August 31. One Simple Snapshot may win \$12,250

HURRY, camera fans, hurry! Just a few days more and all entries for Kodak's great International \$100,000 Competition must be in!

Pictures must be made on or after May 1 and mailed not later than August 31 . . . must reach Prize Contest Office by September 7 to compete.

The time is short . . . though not too short to win. There are still 265 prizes totaling \$6,310 for the Canadian District, which comprises Canada, Newfoundland, Saint-Pierre and Miquelon. First prize winner in each of the six classes automatically enters the international judging, where prizes total \$16,000 in cash . . . plus medals, a trophy, and world fame! One picture may win as much as \$12,250!

Remember, this is a contest where only picture interest counts . . . where only amateurs like yourself may compete. You have the same chance to win with a Brownie, Hawk-Eye or simple Kodak, as with a costly camera. The winning snapshot opportunity may present itself today, so keep your camera busy . . . and mail your prints to contest headquarters at once.

See your Kodak dealer today . . . get a supply of film. Clip the contest blank in the corner. Enter to win.

World Notables are Patrons and Judges

Because of the part that photography plays in acquainting one nation with another and in thus furthering a sympathetic understanding among the peoples of the world, many famous personages are acting as patrons or judges of this friendly international event.

The following well-known and popular Canadians will judge the pictures entered from the Canadian District:

Rev. Canon H. J. Cody, M.A., LL.D., D.D. Eminent divine.
Mrs. Emily F. Murphy (Jany Canuck). Famous authoress and magistrate.
Mr. E. W. Grier, P.R.C.A. Noted artist.
Mrs. Nellie L. McClung. Celebrated authoress.
Lieut.-Col. Henri Gagnon. Chevalier de la Légion d'Honneur.
Mrs. L. M. Montgomery Macdonald. Writer of many popular books.

For pictures of the prize-winning kind, use Kodak film in the yellow box or the new Kodak Verichrome film in the yellow box with checkered stripes.

\$7,500 in 286 Cash Prizes for Canadian District Alone . . .

Read these simple rules

- 1 This contest is strictly for the amateur. Any resident of Canada, Newfoundland or Saint-Pierre and Miquelon is eligible, excepting individuals and families of individuals engaged in the manufacture, sale, commercial finishing or professional use of photographic goods.
- 2 Contest starts May 1, closes August 31, 1931.
- 3 An entrant may submit as many pictures as he pleases; provided that the pictures have been made on or after May 1, 1931, that they are mailed under postmark date not later than August 31, 1931, and that they reach the Prize Contest Office not later than September 7, 1931.
- 4 Any Kodak, Brownie, Hawk-Eye or other camera and any brand of film, chemicals and paper may be used in making pictures for this contest. A contestant need not own the camera. The finishing of prints may be done by his dealer. Pictures may be made from roll film, cut film or film pack negatives. But pictures made from plate negatives are not eligible.
- 5 Regular-sized contact prints and also enlargements are eligible. No picture, however, is to measure more than 8 inches long way. Prints shall be made from unretouched negatives only. No colouring or artwork of any kind shall have been done on either negative or print. Prints shall be neither mounted nor framed. Do not write even your name on either front or back of pictures submitted.
- 6 Enclose an entry blank with each lot of pictures. Mail entries to Prize Contest Office, Canadian Kodak Co., Limited, Toronto 9, Ontario. Use the entry blank in last column, obtain others from your dealer, copy the form, or write to the Prize Contest Office for a supply.
- 7 No entries can be returned. All mailings are at owner's risk. Do not send negatives with entries, but be sure they are in your possession and hold them ready to send on request.
- 8 All pictures will be judged solely on general appeal—the interest they arouse. Photographic excellence or technique will not be the deciding factor in determining the prize winners.

SIX PICTURE CLASSES . . . Plenty of Chances to Win

YOU may submit pictures of any subject in this contest. Prizes will be awarded in 6 classes, and your entries will be placed for judging in the classes in which they are most likely to win.

44 PRIZES IN EACH CLASS

- A. Children . . . Any picture in which the principal interest is a child or children; at play, asleep, laughing, "working", close-ups, in everyday clothes or costumes.

Burgess Bedtime Stories

An Anxious Moment

By THORNTON W. BURGESS

When those you love are threatened harm,
'Tis then of all times to be calm.
—Mother West Wind.

Speedfoot and Mrs. Speedfoot had reached the place where they could no longer hope to remain undiscovered by Mrs. Fleetfoot the Anelope. They didn't know that they had already been discovered. They thought that they had been so clever that Mrs. Fleetfoot was still unsuspecting of their presence. Now, however, they could hope to get no nearer without being seen. For a few minutes the two Coyotes lay flat in the grass, watching Mrs. Fleetfoot.

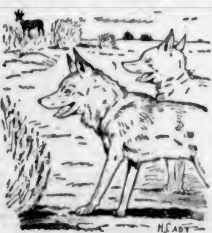

"She doesn't go far from that patch of sage brush over there," whispered Speedfoot. "We'll look that over thoroughly first."
"All right," agreed Mrs. Speedfoot. "Let's go."
So the two coyotes got to their feet and boldly trotted toward Mrs. Fleetfoot. Of course, the instant they appeared, Mrs. Fleetfoot appeared to be in a panic of fright. With a loud snort she bounded away a short distance, the white signal patch around her tail flaring out. Then she turned to face them, her head held high. Speedfoot then chuckled. "What did I tell you?" said he. "If there was nothing to keep her here she would go bounding off, for she knows very well that fast as we are she is faster, and she can outrun us without any trouble. We won't pay any attention to her."

So the coyotes trotted straight for that patch of sage brush. Mrs. Fleetfoot began to bleat as if in distress, and to run back and forth and circle about near the two Coyotes. The nearer they got to the sage brush the more distressed and anxious she appeared to be. Only a mother with danger threatening her babies could be so dreadfully anxious.

Speedfoot chuckled again. "It is just as I thought," said he. "Just look at her. The silly thing does not know that she is giving her secrets away. Of course, those babies won't give out any secret. Our noses won't be of much use. We've got to find them with our eyes."
"Right, my dear," replied Mrs. Speedfoot. "We'll look under every bush and examine each thing that looks like a stone or a little heap of earth. She probably has told them not to move, but if we can frighten them enough one of them may move and then we'll have them. My mouth is watering this very minute."

The Coyotes trotted straight to the patch of sage brush. It wasn't a very big patch and the bushes were scattered. They separated and began to hunt. Mrs. Fleetfoot seemed to be quite beside herself with anxiety. Once she made a short dash at Speedfoot, as if to attack him, but when he turned with a snarl, showing his teeth, she turned and ran back a little. Speedfoot returned and ran back to resume his search and he grinned as he did so. That sudden charge had made him still more certain that they were very near the place where the twins were hidden.

Back and forth, in and out between the bushes the Coyotes went. They looked under every bush. They

Speedfoot chuckled again. "It is just as I thought," said he.

examined every inequality of the ground. Speedfoot tried a sudden yelp in the hope of frightening one of the babies into moving. But though they watched and listened, they saw no slightest movement, and heard no faintest sound. Three times they went over that patch of sage brush, every inch of it. "They are not here," declared Mrs. Speedfoot in a tone of bitter disappointment.
"You are right, my dear," replied Speedfoot, "but they are not far from here. We'll search all around outside this patch. You go that way and I'll go this way."
So they once more separated and Speedfoot began to trot back and forth to the right and Mrs. Speedfoot began doing the same thing to the left, looking under every lone tree and behind every mound and stone. So it was that Mrs. Speedfoot presently drew very near to the place where the twins were hidden. Poor Mrs. Fleetfoot! It was an anxious moment, a terribly anxious moment for her.

The next story: "Mrs. Fleetfoot's Clever Trick."

Just Roamin' Around

By TWO ROVERS

Dear Reader: If you have ever been in disgrace you will feel for me today. I'm in wrong! Rover is huffed with me to a degree; Lillian says I am a piker. So, there you are: I'm the cause of much tribulation to both of my best pals.
I came about thusly: Yesterday morning Rover suggested a tramp out to Beaver Lake; Lillian wanted us to go around the Up-lands. It was obvious to me, right away, so acute is my perceptivity, that I could not please them both. Then, with a heartlessness that Lillian termed "adamantine," and a gruffness that Rover scoffed at, I said: "No roamin' around for me today! I'm all in! Very tired and sleepy, and I am going to loaf around here, at home, all day, to recuperate from the effects of being up 'till daylight did appear," to rest from the effects of eating too much supper (some supper, believe me!) and to think of some scheme how to get the people who write letters to me, undated, unsigned and sans address, to mend their ways and learn to be other than what I think they are."

ROVER REMONSTRATES

"You are a stubborn Boon today and I shall go out to Beaver Lake whether you do or not, and take Miss Lillian with me. What say?"

SUMMER RATES HOTEL STEWART

Photograph May Show Amundsen's Plane in Arctic

BERLIN, Aug. 22 (AP).—The newspaper Lokal Anzeiger today printed a dispatch from Leipzig saying the sharp-edged blotch, which appears on a photograph taken by Prof. Paul Moltischnon while the Graf Zeppelin passed over Nova Zembla on her Arctic journey recently, has been identified as one wing of a seaplane.

Those who have seen the snapshot have been trying to decide whether the blotch is the plane in which Roald Amundsen, noted Arctic explorer, was lost in 1928 while seeking the survivors of the Italia disaster.

Prof. Ludwig Weickmann informed The Lokal Anzeiger that Amundsen's plane was equipped with a tandem motor. Enlargements of the Moltischnon picture are said to indicate two motors installed on each side of the wing.

Prof. Weickmann was quoted as saying it was possible the plane might be Amundsen's.

Australia has a record wool clip.

FIRM OF CABINET MAKERS IN CITY IS INCORPORATED

Wystan and Norman Holland, well known throughout Victoria in connection with their business of cabinetmakers and antique restorers, have been incorporated under the name of Holland Bros. Ltd. Robert James Bell, of Toronto, now being included in the firm.

The two brothers came to Victoria about twelve years ago, first being engaged in various capacities in the building and contracting

business. Three years ago they opened the cabinetmaking shop they now occupy, at 943 Fort Street, and the rapid strides the business made have dictated this latest step.

Mr. Bell, who is now included in the firm, both as an active partner and as a director in the newly-formed company, has had wide experience in this business, both in England and Toronto.

The well-planned showroom of Holland Bros. Ltd., is featuring a display of new and antique furniture of exceptionally high standard.

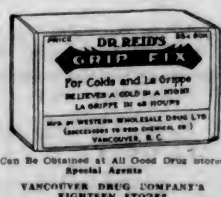

Cotton yarn production is increasing in Japan.

Terribly Itchy Pimples Disfigured Face. Cuticura Healed.

"My trouble began with the skin on my face turning red and being itchy. Later pimples broke out and they were very hard, large and red. They were terribly itchy and every one of them festered and scaled over. My face was disfigured by them. The trouble lasted for about three months."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. I purchased more and after using two cakes of Cuticura Soap and two boxes of Cuticura Ointment I was completely healed." (Signed) Miss Jean Petrie, Diamond City, Alta.

Soap 25c. Ointment 25c. and 50c. Talcum 25c. Sold everywhere. Sample free. Address Canadian Depot: J. T. Watt Company Limited, Montreal.
